

Agile Delivery Manager for Cloud

G-Cloud 15

Framework reference: RM1557.15

About the company

Jyochan Consulting is a premier IT technology and consulting firm, founded by visionary tech enthusiast Kalyan Kakaraparthi. With over 20 years of industry experience, we specialize in leveraging cutting-edge technology to deliver tailor-made solutions that precisely meet the unique business needs of our clients. Our commitment to personalized service helps us build enduring relationships and empower our clients to achieve their full potential.

Driven by a passion for innovation, Kalyan founded Jyochan Consulting with the conviction that advanced technology can revolutionize not only businesses but entire industries. Our dedicated team of experts is focused on helping your business grow through innovative, effective solutions and a commitment to excellence in all we do.

What we do

Jyochan Consulting is a tech consultancy specializing in Agile and Cloud technologies. We boost your technical capabilities and drive innovation by partnering with leading technology innovators. Our expertise lies in managing and delivering complex transformation projects, giving you full control over your teams and outcomes.

We offer strategic advisory, transformational delivery, and project outsourcing, complemented by technical teams and on-demand experts for smooth execution. Our mission is to steer your business towards technological independence and lasting success.

How we add value

Jyochan Consulting delivers unparalleled value by empowering businesses to harness the full potential of Agile and Cloud technologies. Our expert-driven approach accelerates innovation and technical capabilities, enabling businesses to not only meet current challenges but also to future-proof their operations. By providing tailored solutions, comprehensive project control, and access to specialized expertise, we help organizations optimize their processes, reduce time to market, and achieve significant operational efficiencies. Our commitment is to ensure that every client becomes more agile, resilient, and competitive in their respective markets.

We've supported

Jyochan Consulting team have successfully partnered with a diverse range of clients across both public and private sectors, delivering complex transformational projects and strategic engagements. Our expertise spans digital transformation, regulatory compliance, and leveraging the latest technological advancements to meet specific business needs. Our notable client portfolio includes esteemed organizations such as Lloyds Banking Group, MS Amlin, the UK Home Office, the Ministry of Justice, and the Office for National Statistics. These collaborations highlight our ability to deliver substantial value and drive success in various challenging environments.

About our Service

Our Agile Delivery Management service provides seasoned delivery professionals adept in Scrum, Kanban, and the full GDS lifecycle (Discovery through Live). We ensure adherence to GDS standards, collaborating closely with stakeholders and development teams to deliver user-centric solutions that meet rigorous service assessments and user needs.

Features of the Service

- Delivers cloud solutions from initial discovery to live deployment
- Certified in Agile, Scrum, Kanban, and SAFe methodologies
- Manages product roadmaps and backlogs effectively
- Skilled in stakeholder and multi-supplier management
- Proficient in GDS service assessments and standards
- Prioritizes risk management and governance
- Experienced in managing cloud solution deliveries
- Ensures delivery assurance and RAID management
- Collaborates with product, architecture, security, and engineering teams

Benefits of the Service

- Consistently delivers projects on time and within budget
- Early engagement in project lifecycle improves outcomes
- Extensive experience in both government and private sectors
- Skilled in managing complex multi-supplier environments
- Promotes continuous learning and improvement
- Increases transparency and improves communication
- Replaces legacy solutions with modern, efficient systems
- Reduces costs and risks effectively
- Flexible approach to agile implementation to suit teams and projects
- Ability to coach teams to ensure continuity and collaboration
