Microsoft Copilot Studio Development: Prototype to Production

Copilot Studio: Prototype to Production

The Prototype to Production package accelerates the safe, confident transition of Copilot agents into fully governed, production ready solutions

Benefits

The Prototype to Production package accelerates the safe, confident transition of Copilot agents into fully governed, production ready solutions. Clients benefit from:

- Reduced delay between prototype and production, realising value faster.
- Greater confidence in AI behaviour, safety, and reliability.
- Faster governance and risk sign off through clear evidence and controls.
- Lower delivery risk by identifying issues early.
- Clear ownership and responsibilities ensuring smooth long-term management.
- Higher user adoption through validated design and refined behaviour.
- Avoid wasted investment by identifying solutions to stop or reshape early.
- Accelerated delivery of trusted, production ready Copilot agents.

Features

Features of the Copilot Agents: Prototype to Production package include:

- Assess production readiness of Copilot or AI prototypes.
- Identify technical, organisational, and adoption blockers.
- Provide evidence-based decisions to release, rebuild, rescope, reset, or stop.
- Deliver AI behaviour assurance through structured evaluation and testing.
- Assess governance, security, and compliance for safe operation.
- Support brownfield integration across Microsoft 365 and Power Platform.
- Focus delivery on minimum work needed for the outcome.
- Define clear service boundaries with transparent exit criteria

Wider Service Offerings:

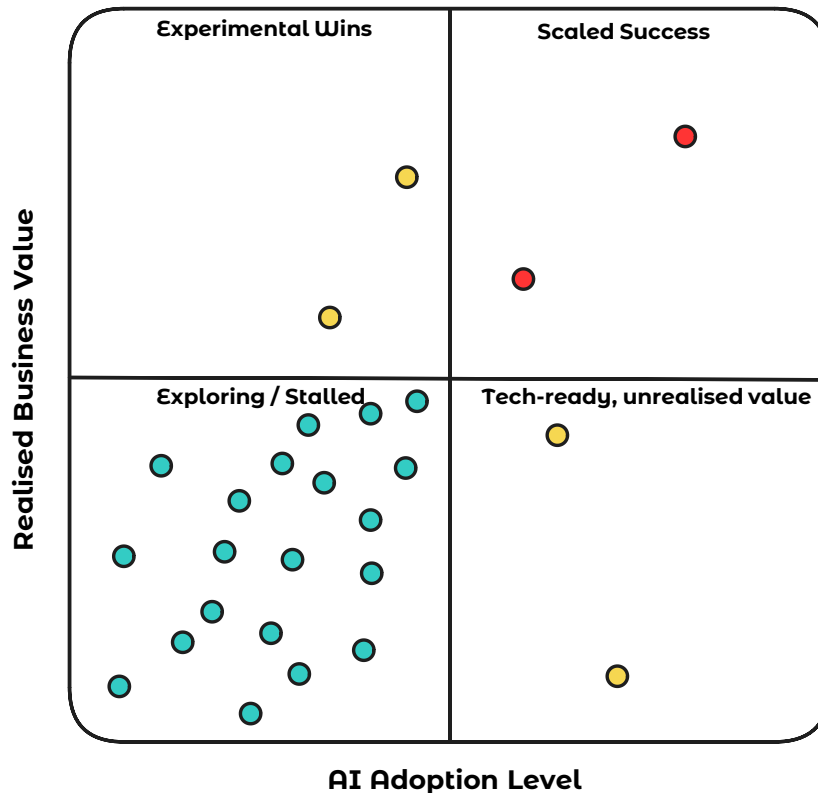

Marra can provide guidance on introducing additional packages for other Power Platform components if required (Power BI, Power Automate, Power Pages and CoE).

The Challenge

Many organisations want to use AI but don't know their next step.

Some haven't started; others have pilots or early agents but no scale or governance.

The result: stalled progress and unrealised business value.

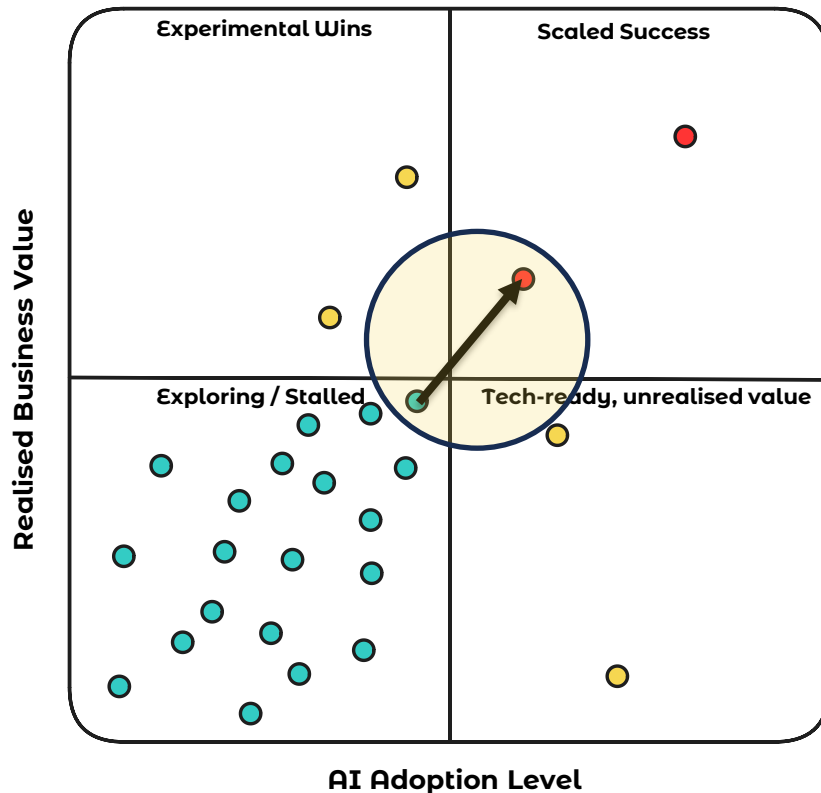

The Solution

We meet you where you are – and help deliver what's next

- Assess readiness across people, process, and technology.
- Identify the next practical step that adds value.
- Target the right pain point with the right Copilot Agent.
- Deliver a working Copilot Agent, not just a plan.

In short – move you one step up and to the right.

What we can deliver

Strategic Consultancy

Do you need an external specialist to drive your Microsoft Power Platform strategy?

We can:

- Review specific business areas and identify potential improvements
- Create a backlog of opportunities with you
- Triage, categorise and prioritise your backlog with you
- Define a roadmap with a timeline
- Agree on a delivery plan and approach

Managed Delivery

Do you need a skilled team to deliver specific Microsoft Power Platform projects?

Invest in a team to:

- Collaborate and deliver outcomes based on adding business value
- Focus on specific outcomes defined within a Statement of Work
- Upskill existing teams through collaboration and knowledge-sharing
- Create a culture for continuous improvement

Team Augmentation

Do you need extra capacity to meet those business deadlines?

Hire a UK based individual or team to:

- Boost your current team capacity
- Access to specialist consultants and specialist skill sets
- Enhance your team's capabilities through collaboration and knowledge-sharing
- Reduce skill and/or knowledge gaps

About Marra

Marra is a tech consultancy focused on Microsoft Power Platform.

We bring together expert tech professionals and Power Platform developers to create exceptional digital solutions and make technology accessible to everyone.

Our talented team—developers, analysts, testers, and designers—works together to solve your biggest business challenges and deliver user-friendly results.

We champion making technology usable for all, with user experience and inclusivity at the forefront.

The values that drive us

Bring the Expertise

We know Power Platform inside out and we love sharing what we know. Our curious minds never stop learning.

Empower Others

Our people have the tools, trust, and freedom to deliver. We bring clarity that helps our customers succeed.

Lead with Trust

We're honest, transparent, and have each other's backs. That's how we build relationships that last.

Work Together

We build solutions with our customers, not just for them — breaking barriers and pushing for real, lasting impact.

Champion Inclusion

We believe tech should include everyone. We build accessible solutions and a culture where all belong.

Build Resilience

We face challenges head-on, lead with positivity, and always keep moving forward, together.

Thank You!
