AssetWorks FleetFocus

REAL TIME FLEET MANAGEMENT FOR THE PUBLIC SECTOR

For many organisations, vehicle equipment assets and the labour needed to maintain them represent significant and increasing expenditures. To succeed, fleet managers need effective tools to help proactively manage these costs and improve their long-term planning. An integrated fleet enterprise asset and maintenance management software solution can be instrumental in improving a fleet's operations and performance through increased equipment/asset availability, decreased maintenance and repair costs, and increased vehicle utilisation. The right software system can also provide better data, in less time, to aid in making decisions that will have positive long-term effects for the organisation.

FleetFocus is a comprehensive maintenance management system that consolidates all information into a single system. It was designed by fleet managers, for fleet managers with robust features and an easy-to-use interface. FleetFocus can track an unlimited number of vehicle assets and supports an unlimited number of workstations from any number of locations.

FleetFocus tracks all functions related to the maintenance of vehicle equipment including repair and preventive maintenance (PM) work orders, operating expenses including fuel, oil, and licensing, and billing for equipment usage.

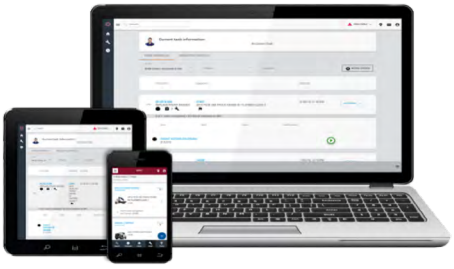

BENEFITS YOU CAN COUNT ON

- Easy-to-use web-based application that helps you manage and automate the complete lifecycle of vehicles and assets, within a single, integrated system.
- FleetFocus is proven to optimise operational workflow and process, tackle inefficiencies, and improve fleet performance.
- Extend the useful life of vehicles with tools to forecast replacements and change at the optimal point.
- Measure and reduce carbon emissions, improve fuel management & identify inefficient vehicles.
- Optimise inventory levels and increase warranty recovery.
- Extends mobile technology to reduce administrative tasks and eliminate dual data entry.
- Minimises risk, ensuring regulatory compliance for vehicle maintenance and inventory management.
- Out-of-the-box integrations including fuel import both bulk & cards, tyre management, telematics, billing, etc.

apse Approved Partner

AssetWORKS | FleetFocus

OUR INTEGRATED PLATFORM INCLUDES:

- DVSA Earned Recognition software supplier.
- APSE approved partner.
- Over 35 years of fleet management experience managing over 500 customers.

DVSA EARNED RECOGNITION

ALL YOU NEED IN ONE PLACE TO INITIALLY SETUP:

- Project Management.
- Software Implementation.
- Data Migration of existing Fleet records.
- Training – remote and onsite.
- Go Live Support – remote and onsite.
- Industry-standard coding pre-loaded for sleek data migration.

Number of Vehicle Assets	Cost per licence band per month
100	£422.00
250	£1,055.00
750	£3,165.00
1,000	£4,220.00

Start today with just three easy steps:

- Choose your Fleet Size which includes all hosting costs.
- Add on any Extras.
- Don't' worry about users; these are totally unlimited and concurrent.

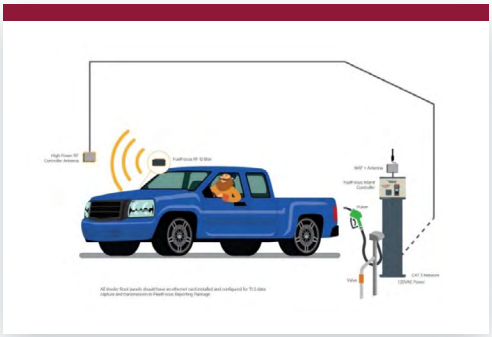

Functionality and modules supplied:

- Asset Management | Administration | Maintenance Operations | Workflow Management | Inventory Management | Labour Resource Management | Fuel Management | O'Licence | Billing and Business Intelligence | Dashboards | Screen Designer | SmartApps | Hire & Motor Pool Management | Collision Management | Equipment Management | Driver Daily Checks | Defect Management | Fully Mobile Tablet-Based Operations | Parts Management

AssetWORKS | FleetFocus™

Extras:

- Additional vehicle licences can purchased in blocks of 25 and at the rate of £82.00 per month.
- Implementation and any third-party costs are not included in the above pricing. Typically, these elements vary subject to the detailed requirements of each customer. Implementation services will be charged as per the AssetWorks rate-card for professional services; a copy of which forms part of the AssetWorks G-Cloud listing.

Hardware:

- Optional 'Fuel Hardware' is available to purchase both pre and post project. AssetWorks can remove any requirement for third party interfacing and replace existing hardware such as Triscan or Merridale.
- FuelFocus Model 1350 2 Hose Controller with Dallas Reader & Pedestal £3,425.00.
- Alternate configurations for 4/8/16 pump controllers available on request and with a choice of card or tag readers.

Other things you may need to know:

- Any final quotations will be subject to acceptance by both parties and accompanied by a signed 'Statement of Works'.
- Fuel hardware can be installed by the customers preferred fuel contractor, or an AssetWorks approved partner. Pricing for services will be dependent on the number of controllers purchased and the scope of works to replace, or to install within a different position within the fueling zone.
- All Prices quoted exclude VAT.

OTHER ASSETWORKS SOLUTIONS THAT INTEGRATE INTO FLEETFOCUS

API Gateway

AssetWorks APIs will allow customers to build their own integrations without relying upon AssetWorks resources. With APIs, customers will be fully responsible for building and maintaining their own integrations, providing a level of customisation and independence required by modern fleet organisations. APIs will not affect existing interfaces and integrations.

Asset Analytics

Fleet management is becoming increasingly data driven, with technology like connected vehicles, telematics, and in-vehicle AI generating more data in all segments of fleet operations. With the Asset Analytics Platform, let AssetWorks be your data analyst.

The AssetWorks Asset Analytics Platform is a cloud-based solution consolidating internal and external asset data sources to deliver next generation business intelligence content, standard KPI/metrics, visualisations, and self-service reporting so fleets can make data driven decisions. The platform offers the interactive features required of modern fleet and asset managers to take full control of their data.

Features

- Out-of-the-box standard content, including industry standard KPIs and metrics
- Interactive dashboards with next generation visualisations in a secure portal
- Built with industry-leading Azure Cloud database and data analysis applications
- Seamless data movement through APIs from customer's data source to cloud data lake
- Data engine transforms raw data into standard fact-dimension structured data warehouse
- Data is housed in a secure, customer specific data warehouse
- Customer access to analytics services to develop own content
- Accessible from desktop or tablet

Benefits

- Dynamic and interactive reporting, visualisations, and analysis
- Industry standard KPIs are ready to deploy with simple configurations
- Save hours of time building and maintaining your own reporting environment and reports
- Intuitive portal design is easy to learn and navigate
- Use and save filters to select specific dimensions and fact records
- Drill up/down through multiple hierarchies to view data by node
- Executive Summary dashboards and visualisations designed for leadership
- Drive innovation and excitement through reporting
- Consolidate data from multiple sources into a single reporting platform
- Direct access to data for self-service reporting
