1 Introduction

1.1 Purpose

This service definition is designed to provide a high-level overview of Orchestrato's **AI Maturity Assessment Service** for G-Cloud15.

If you have any questions, please contact us on g-cloud@orchestrato.com.

1.2 Overview of Orchestrato

Orchestrato Ltd (trading as "Orchestrato") was founded in 2013 as a professional services consultancy to support organisations large & small with the migration to Cloud and optimising performance within Cloud, by helping address the challenges faced with people, process & the new technologies.

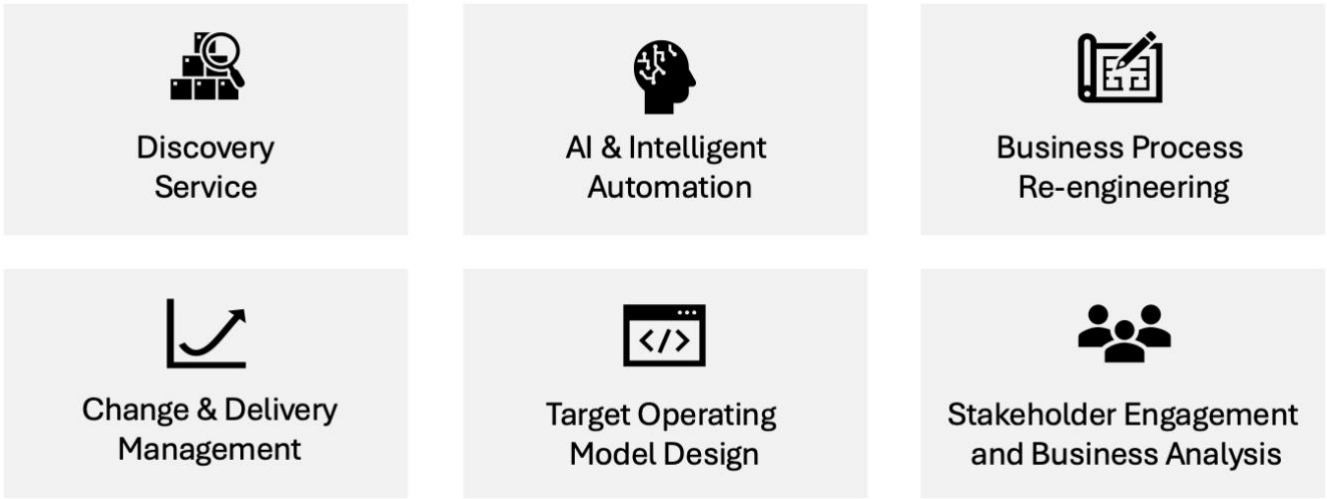

1.3 Our People

Our people have supported a multitude of projects in both the public and private sector and are passionate about delivering tangible outcomes that help our customers prosper.

They have also worked, either directly or indirectly via a Prime Contractor, with the Home Office, Crown Prosecution Service, Insolvency Service and MoD, as well as being founder members of Vivace - the innovation ecosystem which powers the Home Office's Accelerated Capability Environment (ACE).

1.4 Our Services

We offer a range of specialist services via a diverse team of security cleared professionals:

2 AI Maturity Assessment Service

2.1 Service Summary

Our AI Maturity Assessment gives public sector organisations a clear, evidence-based view of their current AI capabilities. We evaluate strategy, data, people, technology, governance and readiness, benchmark against best practice, and provide a pragmatic roadmap to close gaps, reduce risk and accelerate safe, effective AI adoption.

2.2 Service Features

- **Comprehensive current-state assessment** - A structured review of AI adoption, processes, skills, culture, risks, compliance and operational maturity.
- **Data, technology & architecture readiness review** - Assessment of data governance, data quality, AI tooling, tech stack, security, deployment practices and monitoring.
- **Stakeholder interviews, workshops & questionnaires** - Sessions with leaders, practitioners and end-users to capture perceptions, challenges, opportunities and constraints.
- **Skills, capability & organisational readiness evaluation** - Review of AI literacy, skill gaps, change readiness, talent readiness and operating-model implications.
- **Gap analysis & benchmarking** - Benchmark against industry standards, peers and proven AI maturity models to identify areas of under-investment or risk.
- **Identification of AI use-case opportunities** - Assessment of existing AI initiatives, potential applications and areas where AI could deliver measurable value.
- **Risk & compliance assessment** - Evaluation of governance structures, ethical considerations, regulatory alignment, and organisational risk appetite.
- **Maturity scoring, visualisation & reporting** - Clear dashboards, maturity scores, heatmaps and narrative analysis to show strengths and priority areas for improvement.
- **Actionable roadmap & recommendations** - A realistic implementation plan with prioritised steps, investment requirements, delivery sequencing and expected impact.

2.3 Service Benefits

- **Clear understanding of current AI capability** - Gives leaders an objective view of organisational strengths, gaps, risks and opportunities in AI adoption.
- **Better-aligned AI strategy & investment** - Ensures AI initiatives align with organisational goals, data readiness and resource capacity.
- **Reduced risk and improved governance** - Identifies compliance gaps, ethical risks and governance weaknesses to support safer AI deployment.
- **Accelerated time-to-value from AI** - Provides a focused roadmap that pinpoints quick wins, high-impact use cases and scalable foundations.
- **More confident decision-making** - Delivers evidence-based recommendations grounded in benchmarking and structured maturity analysis.
- **Stronger organisational capability & culture** - Supports uplift in skills, roles, behaviours and operating models required for long-term AI success. -
- **Better visibility of ROI & future potential** - Clarifies where AI can deliver measurable value and how to build the foundations for scalable adoption.

3 Clearances & Security

The majority of our resources either hold SC or DV security clearances, and at the very minimum have been BPSS checked.

As a company, Orchestrato is Cyber Essentials certified and our Information Security Policy and wider policies align with the National Cyber Security Centre (NCSC) guidelines and industry best practice.

4 Engagement

4.1 Order Process

All customers are appointed a Service Manager and Project Manager, and where appropriate technical SME support.

This team will work closely with the customer, and any associated / key stakeholders, to define the scope of works, deliverables, timescales, and investment required to deliver the customer's desired outcomes. This in turn will be used to structure and agree a G-Cloud order form, in accordance with the Digital Marketplace supplier assessment and contract award process.

4.2 Onboarding

Orchestrato believe strongly in the benefits to the customer of a thorough On- and Off- boarding process.

As a business we pride ourselves in the amount of time and effort we invest in understanding our customer (and any wider stakeholders) needs and priorities, to ensure that we deliver to time, cost and quality.

Once the contract has been awarded, we will invite the customer to a kick-off / mobilisation meeting to establish the high-level priorities, activities, and ways of working to ensure we can achieve the best possible outcome(s).

This will be followed by a detailed project planning session, tailored to meet the customers' requirements, where we would agree the preferred delivery methodology and cadence of reporting.

Finally, your appointed Service Manager will agree the governance and oversight necessary to ensure delivery and customer satisfaction.

4.3 Performance, Ongoing Support and Service Constraints

As a professional services provider, Orchestrato will look to agree the levels of support at project inception, the levels of which may be reviewed later at the customer's request and amended via formal change request.

All service performance reviews will be conducted with your appointed Delivery / Project Manager, and escalated if necessary to your appointed Service Manager.

www.orchestrato.com

All roles within the service, will be clearly defined at outset and named resources advised formally in writing (including all contact information) to the customer directly following the kick-off meeting.

Standard response times to any issues will be one working day during our normal working hours, which are 8.30 a.m. to 5.30 p.m. Monday to Friday.

Any service constraints will be defined and agreed with the customer at outset.

4.4 Offboarding

On all professional services support services, Orchestrato always look to close down each service with a thorough retrospective and written report. As data back-up, disaster recovery and restoration are not core to this service, any activities in these regards would be planned and agreed on a project by project basis.

Orchestrato's Disaster Recovery & Business Continuity Plan is available on request.

5 Additional Information

5.1 Service Pricing

All pricing for this service is based on Orchestrato's G-Cloud15 rate card, which is on the Digital Marketplace.

To assist with pricing this service, we would expect a typical service wrap to include the following;

- Service Manager: 1 day per month
- Discovery Lead:: Minimum 1 day per week (dependent on size of project)

5.2 Invoicing

Invoicing will be raised monthly, on 30-day payment terms.

5.3 Accessibility

All material produced will comply with the minimum accessibility standard WCAG 2.2.

5.4 Intellectual Property Rights

All Intellectual Property Rights in or arising out of or in connection with the G-Cloud Services shall be owned by the Supplier. The Customer shall have no title to or interest in any such Intellectual Property Rights except to the extent specifically set out in a G-Cloud Call-Off Agreement.

5.5 Company Website
