DISRUPTION DUE TO FLAWED
EXECUTION.**

- GARTNER

Track record of success for global companies across all sectors including EDF, Grundfos, Gates Corporation, Dormakaba, Sony Music, Synthomer and Informa.

"Xmateria was an absolute delight to work with. I would welcome any opportunity to work with them again."

Programme lead, Grundfos

FOCUS

Xmateria is a highly specialist data migration practice, providing the expertise and transformation technology to help companies transform and migrate their SAP landscapes.

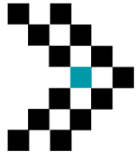

EXPERIENCE

TECHNOLOGY

Capability and expertise in all mainstream SAP data migration and transformation technologies with particular focus on landscape transformation and data discovery.

CERTAINTY

CUSTOMER CHALLENGES

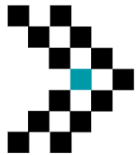

M&A

Xmateria works with companies to help them quickly integrate acquisitions into their SAP environments, putting in place the fundamentals for a successful data migration: clear requirements, a structured methodology, focus on data quality and a high-performance technical solution.

DIVESTMENTS

A divestment for a company which runs SAP typically involves a selective carve-out of the divested entities or assets. Working with Natuvion DCS landscape transformation technology, Xmateria offers a clean and comprehensive separation into a target hell environment.

S/4HANA

Whenever a migration from ECC to S/4HANA involves a selective data migration, meaning a new implementation or an SDT of the existing environment, Xmateria is ideally placed to advise and deliver the data migration workstream.

CLOUD

For customers who are looking to selectively migrate their SAP landscape to a cloud-hosted environment or who want to migrate from SAP to a third-party cloud solution, Xmateria will lead and deliver the data migration from discovery and design through to cutover.
