RII pricing provides for PRIISM offerings and solution options that will be coordinated and agreed upon between the customer and RII.

Pricing Overview

RII offers access to our **PRIISM™: Secure SaaS for Full Spectrum Targeting and Multi-Domain C2** capability and services to accommodate organisations of variant sizes and needs. To support specific operational requirements, RII provides configuration services for Mission Applications. This facilitates the migration of workflows from self-maintained, localised capabilities into the secure PRIISM SaaS platform. Data integration provides increased value to organisations and their processes through Enterprise-scale solutions within secure Cloud architectures, enabling Big Data capabilities. Additional service options are offered to address needs for additional operational support that includes: unique deployment configurations, security accreditation, helpdesk and user support and training. The range of PRIISM access and optional service options permits a tailored environment that can be aligned with business needs.

Item #	Offering	Description	Duration	Price
L2-1	PRIISM-Full Licence	Access to the core PRIISM functionality on one network enclave (unclassified, secret, above secret) for up to 250 users for one year. Includes 1 PRIISM Mission Application for 1 year term.	12 months	£2,340,000
L2-2	PRIISM-Trial Licence	Access to the core PRIISM functionality on one network enclave (unclassified, secret, above secret) for up to 75 users for one year. Includes 1 PRIISM Mission Application for 1 year term	12 months	£1,720,000
L2-3	PRIISM-Exercise Licence	Access to the core PRIISM functionality on one network enclave (unclassified, secret, above secret) for up to 25 users for use during an exercise or experiment. Includes 1 PRIISM Mission Application	4 months	£200,000

L2-MA	MA-Access	Additional PRIISM Mission Application for 1 year term	12 months	£390,000
Solution Modules and additional support packages: Provide a means for user organisations to obtain custom integration, command or function specific modules that ease the integration from an organisation's localised and self-maintained set of capabilities into the PRIISM environment that provide increased value to their organisations and processes through Enterprise-scale solutions in secure Cloud architectures, enabling Big Data capabilities. Prices are on a per annum basis. Customers will work with RII to determine the size and complexity of the business processes, data integration and/or objective outcomes to be achieved for the selection of a small, medium or large solution module and additional support packages.				
L2-4	Small Solution Module	- Address organisation-specific needs via custom business process integration implemented as part of the PRIISM product.. - Business process documentation and implementation as part of the PRIISM product	3 Months	£1,040,000
L2-5	Medium Solution Module	- Address organisation-specific needs via custom business process integration implemented as part of the PRIISM product. - Business process documentation and implementation as part of the PRIISM product - Data ingest and interface configurations with external systems	6 months	£2,010,000
L2-6	Large Solution Module	- Address organisation-specific needs via custom business process integration implemented as part of the PRIISM product. - Business process documentation and implementation as part of the PRIISM product - Data ingest and interface configurations with external systems - Creation of new data managers to support organisational workflows	12 months	£3,600,000

L2-7	Init-Level-1	Tiered sizing to deploy and integrate PRIISM Core with additional Mission Application into a user's organizational infrastructure including includes Business Process and Use Case analysis, Configuration Tailoring, System of System Testing Operations & Maintenance of System	12 months	£590,000
L2-8	Init-Level-2		12 months	£1,040,000
L2-9	Init-Level-3		12 months	£1,340,000
L2-10	Sustain-Level-1	Mission Application (MA) sustainment is a recurring annual cost to maintain the MA and PRIISM core software including system administration, patching, a base Service Level Agreement (SLA) and Information Assurance (IA) accreditation maintenance. This item constitutes the Managed Operations & Support package for the buyer's environment. Price is determined based on the size and complexity of the integration and sustainment of the MA in the user's organization domain and workflow.	12 months	£530,000
L2-11	Sustain-Level-2		12 months	£670,000
L2-12	Sustain-Level-3		12 months	£830,000
L2-13	Initial-Accreditation	This is meant to cover the process of performing an accreditation. This assumes there is no technical work such as new software scanners that require remediation. This includes activities to produce documentation, create any Security Management Plan documentation, upload the documentation to required tracking servers, answer all the questions, and produce any required waiver requests in order to meet the accreditation board.		£540,000
L2-14	Renew-Accreditation	Maintain and renew existing accreditations on private cloud or on-premise instances		£270,000
L2-15	Experimentation Staff Support	This is scoped as a surge of effort to deploy a team to support an exercise or event over a quarter. It will include Developers and Production Operations support of integration changes and updates to facilitate integration in the exercise environment. It will include the delivery of a full report.		£380,000
L2-16	PRIISM - AI Chat Service	The PRIISM AI Chat Configuration service is a fixed-priced package to enable, configure, test and deploy with a set amount of tokens for the LLM Chat feature to all the types in a single Mission Application. This effort includes modifying the types to add the chat service, assessing with the RII team which fields from the type should be added to the context for the chat session and finally the effort from production		£110,000

		operations to connect the service, including firewall changes/requests and then retesting the connection at a later time.		
L2-17	Integration and support	Comprehensive operational support designed to integrate PRIISM into organisational processes and ensure full user adoption. This package includes the development of bespoke, customer specific deliverables tailored to the buyer's workflows. Delivery includes extensive hands-on instruction to ensure analysts are proficient in data entry, situational awareness, and analytic tasks.		£460,000
L2-18	Consultancy & Support	3 months of Surge support by RII technical and operational support staff. This package enables the delivery of ad-hoc requirements including Custom Reporting packs, discovery workshops, and general staff augmentation.		£120,000
L2-19	Ancillary Services	To support specific operational requirements, we offer optional ancillary services priced as fixed line items. You can add Third-Party Data Feeds, Enterprise Connectors to securely link with your legacy systems, or Specialised User Licenses for users who require specific data to support organisational workflow		£20,000
