

Healthtech-1 Automated Registrations – Pricing

Overview

Healthtech-1 Automated Registrations is priced on a simple, transparent usage-based model. Healthcare Organisations only pay for registrations that Healthtech-1 successfully completes on their behalf. There are no long-term commitments required.

Free Options

Healthtech-1 Hub (no automation) is provided free of charge. This allows practices to receive and manage NHS England and/or Healthtech-1 online registration forms within the Hub without enabling automation.

Free trial of Automated Registrations: Practices may be offered a time-limited free usage period for the full Automated Registrations service. Where a two-week trial is provided, fair usage applies and is typically capped at 175 automated registrations.

Pay-as-you-go pricing

Following any free trial, Automated Registrations are charged on a pay-as-you-go basis: - **£2.00 per completed registration + VAT** - Charges apply only where Healthtech-1 completes the registration within the clinical system - Registrations completed manually by the practice are excluded

Invoices are issued monthly in arrears, based on actual usage.

Bulk / credit pricing (optional)

Practices may alternatively agree to purchase a pre-paid volume of registration credits. Credits are drawn down monthly based on usage and may roll over if unused, but are non-refundable.

Price protection

Prices are committed not to increase beyond inflation for the duration of the agreement, unless otherwise agreed.

Changes to pricing

Healthtech-1 may update pricing structures with a minimum of three months' notice.

This document is intended to summarise pricing only and should be read alongside the Healthtech-1 Service Agreement.
