

Healthtech-1 Bookable – Pricing

Overview

Healthtech-1 Bookable is priced on a simple, transparent, outcome-based model. Healthcare Organisations only pay for patients who register through Bookable. Pricing is aligned to patient retention, ensuring value is delivered over time. There are no long-term commitments required.

Price

£28 + VAT per patient, which includes the registration fee. Healthtech-1 will invoice on or around the 1st of each month for £28 (excluding VAT) for every patient that registered through Bookable during the previous month. Payment terms are 30 days.

Retention-based reimbursement

If a patient leaves the practice before four quarters of capitation have been paid, Healthtech-1 will reimburse £7 for every quarter the patient does not remain registered.

Example (all excl. VAT)

If a patient is acquired on 2 January 2025, £28 is invoiced on 1 February. If the patient leaves before the first quarter, £28 is rebated. If the patient stays until June, £7 is earned and £21 rebated. If the patient stays until January 2026, the full £28 is earned.

Free credit

£250 free credit, equivalent to approximately 7.5 patients, may be provided.

Bespoke pricing

Bespoke pricing arrangements can be designed for large groups, including Federations, PCNs, and ICBs.
