Evalian Pricing Document

1.1. Security, Data Protection, Resilience Consultancy & Penetration Testing

- £900 per day (plus VAT) for all consultancy engagements.
- Consultancy days scoped per engagement to determine outcome pricing.
- Time and materials consultancy available to support ongoing work and resourcing needs.

1.2. Managed SIEM & SOC / SOC-as-a-Service

Pricing consists of a one-off initial price for onboarding and service setup, followed by an ongoing managed service charge payable for the term of the contract.

1.2.1. Onboarding / Service Setup Pricing

Onboarding charges are priced at three levels based on the complexity of service setup, as follows:

Simple Basic configuration & standard deployment	£10,000
Standard Enhanced customisation with moderate complexity	£15,000
Complex Comprehensive deployment with advanced requirements	£20,000

Onboarding charges are one-off payments, invoiced at the start of the contract term.

1.2.2. Ongoing Managed Service Charge

The ongoing managed service charge is calculated based on the number of 'units' in scope for the service and the service tier selected by the client.

One unit represents one server (including cloud servers and compute nodes) or one user or other identity. A user unit includes monitoring for up to five devices per user.

The monthly pricing per unit across the three service tiers is as follows:

Essentials Core threat protection and response for endpoints (EDR)	£10.67 per unit / month
Standard Enhanced detection, response and resilience (XDR)	£13.34 per unit / month
Enterprise As per the Standard tier (XDR) in combination with operational security managed services	£POA

The above pricing applies for up to 250 units. Volume discounts are available above 251+ units.

Managed services charges are ongoing for the term of the contract and are invoiced monthly. Charges will be adjusted up or down where the client increases or reduces the number of units in scope.

The above pricing does not include the cost of licences required (e.g. Microsoft Defender licences) to deliver the service; or the subscription costs for the client's Azure tenant in which Microsoft Sentinel and Azure Log Analytics are deployed.

Evalian can support organisations to estimate licence and tenant costs (affected the by the volume of logs to be ingested) and advise on options for managing costs to meet the client's budget.

Invoices are raised in 30-day payment terms unless otherwise agreed.
