

Price List – Records Management System

Service Category	Item Number	Product Name	Product Description	Unit of Issue	List Price (annual)
Records Management System	UK-RMS-PLT	RMS Platform	A comprehensive records, case, and operational management platform that enables UK policing agencies to securely create, manage, and approve police records in compliance with UK legislation and Home Office counting rules. The platform supports end-to-end case and custody management, including crime, safeguarding, missing persons, stop and search, threats to life, use of force, detainee workflows, and court coordination. It delivers integrated property, evidence, warrant, and intelligence management with configurable workflows, role-based access, full audit history, and mobile support. Advanced intelligence handling protects source integrity while enabling controlled dissemination, tasking, and analysis. Users can generate custom fillable PDF outputs from system data and leverage universal search across internal and external data sources to streamline reporting, investigations, and operational decision-making.	per user	£1,885.00
Records Management System	UK-PS-1	Problem Solving Module	The Mark43 Problem Solving - Enhanced Module provides advanced, end-to-end support for the SARA problem-solving model, including Scanning with problem-solving report types (ReportAI) and CHEERS-based candidate evaluation with PDF export; Analysis with problem analytics, visualizations, crime scripts, and AI-generated insights (Insights Integrated, BriefAI); Response with AI-generated refined problem narratives (BriefAI) and EMMIE framework-based response ranking; and Assessment through configurable response assessment surveys.	per user	£140.00
Records Management System	UK-AI-1	BriefAI	AI generated case summaries and content indication as well as Privacy/Security control within RMS Report Writing and Case Management.	per user	£280.00

Service Category	Item Number	Product Name	Product Description	Unit of Issue	List Price (annual)
Records Management System	UK-AI-2	ReportAI	AI generated report narratives based on the information collected in CAD and OnScene, AI generated content indication, editable narratives and privacy/security control within RMS Report Writing plus CAD Dispatcher/Call-Taker or a supported third-party CAD integration.	per user	£280.00
Records Management System	UK-MOB-RMS-1	RMS OnScene Mobile Application	The Mark43 OnScene Mobile Application for RMS enables efficient first responder field data collection and a seamless workflow to the RMS handheld device.	per user	£140.00
Records Management System	UK-RMS-CUST	RMS Custom Configured Module	The RMS Custom Configured Module enables customers to leverage Mark43's native configuration engine to configure additional modules and applications for additional workflows that are not supported in Mark43's standard RMS modules and applications. This enables users to leverage Mark43 for additional use cases and needs. Additional one-time services may be required for the set up and implementation of each Custom Configured Module purchased.	per user	£500.00
