

Our Belief:

We believe the time has come for a radical, change in the way healthcare consulting is delivered. We have a proven approach to delivering remote and robust solutions, successfully delivering Electronic Patient Records, IT systems, cloud hosting and software support, and supporting various needs of the NHS and other companies despite the pandemic.

What do we do?

We don't try to pretend to do everything, but we pride ourselves on doing what we do well.

Core offerings:

- Business case creation
- Programme and Project Management
- Procurement and contract management
- Business Analytics
- System Implementations
- System configuration and optimisation
- Business Intelligence (data, informatics, reporting and dashboards)
- Core Infrastructure on-shore and off-shore hosting
- Cyber Security including hosting and patching
- Interoperability and Integration
- Training – classroom and e-learning
- Data Migration
- Bespoke toolkits (such as COVID-19 data reporting)
- Data Cleansing
- Data Warehousing - design and management
- Cloud Hosting including AWS, Azure and custom developed platform
