Managed Cloud Services And Operational Support

This category covers the ongoing operation of cloud services once live. Buyers often struggle with fragmented support models, unclear responsibilities, and limited operational insight.

We provide managed services that integrate monitoring, incident management, optimisation, and continuous improvement. Services are designed to complement existing teams and suppliers, with clear service boundaries and escalation paths.

Clients benefit from improved service stability, faster issue resolution, and ongoing optimisation. Operational support becomes proactive rather than reactive, supporting service reliability and user confidence.

Disaster Recovery Planning And DR Test Support

Managed Cloud
Services and
Operational Support

This service helps organisations prepare for and respond to major service disruptions. Wiz Digital supports disaster recovery planning and structured DR testing that validates recovery strategies, confirms recovery objectives, and strengthens the resilience of cloud services in line with organisational and public sector assurance requirements.

Service Overview

- Definition of disaster recovery strategies and scope
- Analysis of recovery architectures and dependencies
- Definition and validation of RTO and RPO
- Design of DR runbooks and procedures
- Design and execution of DR test scenarios
- Validation of failover and failback processes
- Capture of test evidence and outcomes
- Identification of resilience improvement actions
- Alignment with continuity and assurance requirements
- Clear disaster recovery documentation

Service Features

- Stronger resilience of critical cloud services
- Increased confidence in disaster recovery readiness
- Reduced likelihood of prolonged service outages
- Clear and tested recovery procedures
- Confirmed recovery time and point objectives
- Reduced impact of major disruptions
- Improved compliance and assurance confidence
- Better understanding of recovery gaps
- Clear prioritisation of resilience improvements
- Sustainable foundation for disaster recovery planning
