Risk and Governance Enablement

Classification: Public

Lot 3 – Cloud Support Services

**Wiz Digital Is A Digital Firm That Transforms
Data, AI, And Cloud Into Secure, Scalable
Products And Services.
Delivered At Speed, Engineered For Tomorrow.**

Our Mission

We Empower Organisations By Engineering Secure, Scalable Innovation That Unlocks Growth, Sharpens Efficiency And Delivers Lasting Impact.

Cloud Solutions That Drive Innovation

AI Solutions

Pilot Programs,
Automation,
and Analytics/Reporting

Data Services

Governance, Quality,
Migrations, MDM, and
Insights/Reporting

Cloud Infrastructure

Migration, Modernisation,
Managed Services, and
Deployments

Modernisation

Micro-Services,
Development, Low Code,
CRM and Architectures

Managed Services

Monitoring and
Maintenance, Application
Support, and Security

Advisory

Strategy, Change and
Process Management,
and Risk Mitigation

Delivery That Ignites Transformation

Custom Pods

A laser-focused squad, built just for your mission.

- Hand-picked cross-functional talent; Budget surety right from the start
- Flexes in size as scope evolves—no stranded bench

Embedded Teams

Our experts, fully woven into your culture.

- Operate inside your tool-chain & ceremonies
- Knowledge transfer baked in—capability uplift for your staff

Managed Services

We Run & optimise, while you focus on growth

- 24 × 7 monitoring with SLA-backed response
- Continuous improvement pipeline (cost, performance, security)

Project Delivery

Fixed outcomes against clear milestones.

- Scope, timeline, budget locked in upfront
- Dedicated delivery lead + risk registry
- Stage-gate sign-offs ensure zero surprise overruns

G-Cloud 15 Service Offerings

- 1 Cloud Strategy, Architecture, and Advisory
- 2 Cloud Programme, Portfolio, and Delivery Governance
- 3 Cloud Migration and Modernisation Planning
- 4 Cloud Foundation and Platform Enablement
- 5 Cloud Migration and Transition Delivery Support
- 6 Data Platforms, Analytics, and Information Management
- 7 Cloud Security, Risk, and Assurance
- 8 Cloud Financial Management and Sustainability
- 9 Managed Cloud Services, and Operational Support
- 10 Quality Assurance, Testing and Service, Validation
- 11 Training, Enablement, and Knowledge Transfer
- 12 AI Platform Enablement, Governance, and Operations

12

AI Platform Enablement, Governance, And Operations

This category supports organisations adopting AI capabilities within cloud environments, where operational, ethical, and governance considerations are often underdeveloped.

Our approach focuses on making AI operable and governable at scale. We design platforms, controls, and operating models that support responsible use, ongoing monitoring, and integration with existing cloud and data services.

Clients gain AI capabilities that are sustainable, secure, and aligned to organisational risk appetite. This enables innovation while maintaining trust, transparency, and operational control.

Responsible AI Controls, Risk And Governance Enablement

AI Platform Enablement, Governance, and Operations

This service establishes governance and control frameworks that enable responsible AI adoption. Wiz Digital helps define policies, roles, and evidence-led processes for risk assessment, model approval, oversight, and ongoing monitoring. The focus is practical governance that supports trust, accountability, and compliance readiness in public sector contexts.

Service Overview

- Responsible AI control framework definition
- Risk assessment approach and control mapping
- Governance operating model, roles, and accountability
- Model approval gates and review checkpoints
- Documentation and evidence requirements definition
- Human oversight and escalation design
- Alignment with data governance and security policies
- Supplier and third-party risk considerations
- Assurance reporting and governance cadence design
- Governance documentation and handover guidance

Service Features

- Reduced organisational risk from AI adoption
- Clear accountability and oversight mechanisms
- Improved compliance and assurance readiness
- Greater trust in AI-enabled services
- More transparent decision-making controls
- Reduced likelihood of harmful outcomes
- Improved stakeholder and user confidence
- Stronger audit trails and evidence packs
- Consistent governance across AI initiatives
- Sustainable responsible AI capability over time
