Managed Cloud Services And Operational Support

This category covers the ongoing operation of cloud services once live. Buyers often struggle with fragmented support models, unclear responsibilities, and limited operational insight.

We provide managed services that integrate monitoring, incident management, optimisation, and continuous improvement. Services are designed to complement existing teams and suppliers, with clear service boundaries and escalation paths.

Clients benefit from improved service stability, faster issue resolution, and ongoing optimisation. Operational support becomes proactive rather than reactive, supporting service reliability and user confidence.

Patch, Vulnerability And Configuration Management Support

Managed Cloud
Services and
Operational Support

This service helps organisations manage security and stability risks arising from unpatched systems and misconfigurations. Wiz Digital supports the design and operation of patching, vulnerability, and configuration management practices that reduce exposure to known risks while maintaining service reliability and governance.

Service Overview

- Definition of patch and vulnerability management processes
- Identification and prioritisation of security vulnerabilities
- Planning and support for patch deployment
- Definition of secure configuration baselines
- Monitoring of configuration compliance
- Risk-based scheduling of patching activities
- Integration with security and operations workflows
- Handling of exceptions and remediation actions
- Reporting for assurance and governance
- Clear patching and configuration documentation

Service Features

- Reduced exposure to exploitable vulnerabilities
- Improved security and stability of cloud environments
- More controlled and predictable patching
- Reduced operational disruption from updates
- Better visibility of configuration compliance
- Improved audit and regulatory assurance
- Lower likelihood of security incidents
- Clear ownership of patching responsibilities
- Stronger governance of operational risk
- Sustainable foundation for vulnerability management
