Cloud Foundation And Platform Enablement

This category covers the design and implementation of the core cloud platforms on which services depend. Without a strong foundation, organisations often experience inconsistent security, spiralling costs, and operational fragility.

We design and implement cloud foundations that are secure by default, scalable, and aligned to organisational operating models. Platform enablement is automated, policy-driven, and designed to support both central governance and decentralised delivery teams.

Clients gain a stable, reusable platform that accelerates onboarding of workloads, improves security posture, and reduces operational overhead. Foundations are built to evolve, avoiding brittle designs that constrain future change.

Microsoft Power Platform Governance And Environment Setup

Cloud Foundation and Platform Enablement

This service helps organisations adopt Microsoft Power Platform in a controlled and well-governed manner. Wiz Digital designs governance models and sets up environments that balance innovation with security, compliance, and oversight, ensuring low-code services can be used safely within public sector and enterprise constraints.

Service Overview

- Design of Power Platform governance structures
- Definition of environment strategy and segmentation
- Setup and configuration of Power Platform environments
- Data loss prevention and policy configuration
- Alignment of identity and access controls
- Application lifecycle management standards
- Security and compliance guardrails
- Monitoring and usage oversight design
- Guidance for makers and delivery teams
- Clear governance documentation and handover

Service Features

- Safe and controlled use of low-code platforms
- Reduced risk of data leakage or non-compliance
- Clear governance for citizen development
- Improved visibility of platform usage
- Better balance between innovation and control
- Reduced operational and security risk
- Scalable adoption of Power Platform
- Improved alignment with organisational governance
- Faster enablement within defined boundaries
- Sustainable long-term platform use
