Data Platforms, Analytics, And Information Management

This category addresses the growing need to treat data as a strategic asset rather than a by-product of systems. Common problems include fragmented data platforms, poor data quality, unclear ownership, and limited trust in analytics outputs.

Our approach integrates platform architecture, governance, and analytics enablement. We design modern cloud data platforms alongside clear information management frameworks, ensuring that data is accessible, secure, and fit for purpose.

Clients gain reliable data foundations that support analytics, reporting, and decision-making. This improves insight, reduces manual effort, and enables more confident use of data across the organisation.

Data Catalogue And Metadata Standards Design

Data Platforms, Analytics, and Information Management

This service helps organisations establish consistent approaches to cataloguing and describing data in cloud environments. Wiz Digital designs metadata standards and catalogue models that improve visibility, understanding, and governance of data assets, supporting compliance, analytics, and effective data management.

Service Overview

- Definition of data catalogue scope and objectives
- Design of metadata standards and models
- Definition of business and technical metadata
- Data classification and tagging standards
- Lineage and provenance requirements
- Alignment with data governance frameworks
- Integration considerations for cloud data platforms
- Guidance for data stewardship and usage
- Tool-agnostic catalogue and metadata standards
- Clear metadata standards documentation

Service Features

- Improved understanding of organisational data assets
- Better data discoverability and reuse
- Stronger governance and compliance controls
- Improved audit and assurance readiness
- Reduced duplication and inconsistency
- Better support for analytics initiatives
- Clear guidance for data producers and consumers
- Improved coordination across data teams
- Scalable approach to metadata management
- Sustainable foundation for data catalogues
