Cloud Migration And Transition Delivery Support

This category focuses on supporting the execution of migrations and transitions into live service. Buyers often face capability gaps, delivery risk, or coordination challenges across multiple suppliers and internal teams.

We provide hands-on delivery support across migration execution, cutover, integration, and service transition. Our role is to stabilise delivery, manage risk, and ensure that operational readiness is achieved before services go live.

The value lies in smoother transitions, fewer incidents, and faster stabilisation post-migration. Clients retain control while benefiting from experienced delivery support at critical points in the journey.

Microsoft Entra ID Architecture, Migration And Hardening

Cloud Migration
and Transition
Delivery Support

This service supports organisations adopting Microsoft Entra ID as their cloud identity platform. Wiz Digital designs target identity architectures, supports migration from existing identity services, and applies security hardening to ensure access is controlled, resilient, and aligned with public sector security and assurance expectations.
