Cloud Strategy, Architecture, And Advisory

This category covers the strategic and architectural decisions that determine whether cloud adoption delivers lasting value or creates long-term complexity. Buyers typically engage these services when facing fragmented estates, unclear cloud direction, competing stakeholder priorities, or regulatory and risk constraints that make off-the-shelf approaches unsuitable.

Our approach is grounded in pragmatic architecture and decision support. We work with senior stakeholders to clarify objectives, constraints, and success measures, then translate these into clear architectural principles, target states, and roadmaps. Advice is independent, evidence-led, and aligned to delivery reality rather than aspirational future states.

The outcome is decision clarity. Clients gain a defensible cloud strategy, a coherent architectural direction, and a shared understanding of trade-offs across cost, risk, capability, and speed. This creates a stable foundation for all subsequent cloud activity and reduces rework later in delivery.

IBM Cloud Strategy And Migration Support

Cloud Strategy,
Architecture, and
Advisory

This service supports organisations considering or adopting IBM Cloud by defining a clear strategy and migration approach. Wiz Digital works with stakeholders to assess suitability, define target architectures, and plan migrations that align with security, compliance, and operational requirements common to public sector environments.

Service Overview

- Definition of an IBM Cloud-aligned strategy
- Design of IBM Cloud target architecture
- Assessment of workloads for IBM Cloud suitability
- Migration planning and sequencing support
- Security and compliance architecture considerations
- Integration and connectivity architecture guidance
- Alignment with operating and service management models
- Identification of migration risks and dependencies
- Vendor-neutral architectural advice within IBM Cloud context
- Clear and reusable architecture documentation

Service Features

- Clear and controlled approach to IBM Cloud adoption
- Reduced migration and delivery risk
- Improved security and compliance alignment
- Better preparedness for IBM Cloud operations
- Clear architectural direction for suppliers
- Reduced likelihood of rework
- Improved governance of cloud usage
- More predictable delivery outcomes
- Better alignment with organisational strategy
- Sustainable platform foundation for future services
