Classification: Public

Lot 3 – Cloud Support Services

**Wiz Digital Is A Digital Firm That Transforms
Data, AI, And Cloud Into Secure, Scalable
Products And Services.
Delivered At Speed, Engineered For Tomorrow.**

Our Mission

We Empower Organisations By Engineering Secure, Scalable Innovation That Unlocks Growth, Sharpens Efficiency And Delivers Lasting Impact.

Cloud Solutions That Drive Innovation

AI Solutions

Pilot Programs,
Automation,
and Analytics/Reporting

Data Services

Governance, Quality,
Migrations, MDM, and
Insights/Reporting

Cloud Infrastructure

Migration, Modernisation,
Managed Services, and
Deployments

Modernisation

Micro-Services,
Development, Low Code,
CRM and Architectures

Managed Services

Monitoring and
Maintenance, Application
Support, and Security

Advisory

Strategy, Change and
Process Management,
and Risk Mitigation

Delivery That Ignites Transformation

Custom Pods

A laser-focused squad, built just for your mission.

- Hand-picked cross-functional talent; Budget surety right from the start
- Flexes in size as scope evolves—no stranded bench

Embedded Teams

Our experts, fully woven into your culture.

- Operate inside your tool-chain & ceremonies
- Knowledge transfer baked in—capability uplift for your staff

Managed Services

We Run & optimise, while you focus on growth

- 24 × 7 monitoring with SLA-backed response
- Continuous improvement pipeline (cost, performance, security)

Project Delivery

Fixed outcomes against clear milestones.

- Scope, timeline, budget locked in upfront
- Dedicated delivery lead + risk registry
- Stage-gate sign-offs ensure zero surprise overruns

G-Cloud 15 Service Offerings

- 1 Cloud Strategy, Architecture, and Advisory
- 2 Cloud Programme, Portfolio, and Delivery Governance
- 3 Cloud Migration and Modernisation Planning
- 4 Cloud Foundation and Platform Enablement
- 5 Cloud Migration and Transition Delivery Support
- 6 Data Platforms, Analytics, and Information Management
- 7 Cloud Security, Risk, and Assurance
- 8 Cloud Financial Management and Sustainability
- 9 Managed Cloud Services, and Operational Support
- 10 Quality Assurance, Testing and Service, Validation
- 11 Training, Enablement, and Knowledge Transfer
- 12 AI Platform Enablement, Governance, and Operations

10

Quality Assurance, Testing, And Service Validation

This category ensures that cloud services meet required quality, performance, and resilience standards before and after go-live. Common issues include inadequate non-functional testing and late discovery of defects.

Our QA approach focuses on validating services against real-world usage and risk scenarios. We define appropriate quality criteria, design targeted testing activities, and provide independent assurance where required.

The result is increased confidence in service readiness, reduced operational incidents, and clearer evidence for go-live decisions. Quality becomes an enabler of delivery rather than a last-minute gate.

Non-Functional Requirements Definition (NFRs)

Quality Assurance,
Testing, and
Service Validation

This service helps organisations define clear, measurable non-functional requirements for cloud services. Wiz Digital ensures expectations around performance, resilience, security, and compliance are explicitly documented and aligned with operational realities and public sector assurance standards.

Service Overview

- Identification of relevant non-functional requirements
- Definition of performance, availability, and resilience criteria
- Security and compliance requirement definition
- Scalability and capacity expectations
- Alignment with service levels and user needs
- Definition of measurable acceptance criteria
- Stakeholder validation and sign-off
- Traceability to delivery and testing activities
- Alignment with governance expectations
- Clear NFR documentation

Service Features

- Clear and testable service expectations
- Reduced risk of quality-related failures
- Improved assurance and validation outcomes
- Better alignment between business and delivery
- Reduced late-stage rework
- More predictable service behaviour
- Stronger service governance
- Improved operational readiness
- Better supplier accountability
- Sustainable service quality foundations
