Cloud Security, Risk, And Assurance

This category supports organisations operating under heightened security, regulatory, or public accountability requirements. Buyers often need to balance innovation with assurance, without defaulting to risk-averse stagnation.

We embed security and risk management into cloud design and operations, rather than treating them as bolt-ons. Our services cover architecture, controls, assurance activities, and audit readiness, aligned to recognised standards and government expectations.

The outcome is improved security posture, clearer risk ownership, and stronger assurance for stakeholders. Clients are able to move faster with confidence, supported by evidence-based controls and defensible security decisions.

Salesforce Identity, Access And Security Architecture

Cloud Security, Risk,
and Assurance

This service supports organisations designing secure Salesforce identity and access models. Wiz Digital defines authentication, authorisation, and security architectures that protect Salesforce services, support integration with enterprise identity platforms, and align with organisational governance and public sector security expectations.

Service Overview

- Design of Salesforce identity and access architectures
- Definition of authentication and single sign-on patterns
- Role, profile, and permission model design
- Privileged and administrative access control design
- Integration with enterprise identity providers
- Definition of Salesforce security configuration standards
- Design of data access and sharing models
- Alignment with security and governance policies
- Consideration of identity-related risks and threats
- Clear Salesforce security architecture documentation

Service Features

- Secure and controlled access to Salesforce services
- Reduced risk of identity and access misuse
- Clear and auditable access structures
- Improved compliance with security requirements
- Better alignment with enterprise identity strategies
- Reduced likelihood of access misconfiguration
- Improved audit and assurance confidence
- Clear guidance for delivery and operations teams
- Stronger governance of Salesforce security
- Sustainable foundation for Salesforce platform security
