Cloud Programme, Portfolio, And Delivery Governance

This category addresses the challenge of governing cloud initiatives at scale without slowing delivery or obscuring accountability. Buyers typically struggle with fragmented ownership, overlapping initiatives, supplier dependency, and weak visibility of progress, risk, and benefits.

We establish proportionate governance models that integrate programme management, portfolio oversight, and delivery assurance. Our focus is on enabling decision-making, managing dependencies, and maintaining control across complex, multi-supplier environments, rather than introducing heavyweight process.

Clients benefit from improved predictability, clearer accountability, and stronger confidence at senior level. Cloud programmes remain aligned to strategic intent, funding constraints, and operational readiness, while retaining the flexibility needed for iterative delivery.

Supplier Exit, Transition And Service Take-On Planning

Cloud Programme,
Portfolio, and Delivery
Governance

This service supports organisations transitioning between cloud service suppliers or taking on new cloud services. Wiz Digital plans exit and take-on activities to ensure continuity, protect service quality, and manage risk. The service aligns contractual, technical, and operational considerations with public sector governance expectations.

- Transition planning for incoming cloud services
- Review of contracts, dependencies, and obligations
- Knowledge transfer and documentation handover
- Management of data, access, and asset transitions
- Risk and service continuity management
- Governance and control structures for transition
- Coordination across outgoing and incoming suppliers
- Sequenced cutover and transition activities
- Clear exit and transition documentation

Service Features

- Reduced disruption during supplier transitions
- Improved continuity of cloud services
- Clear control over exit and take-on activities
- Reduced operational and delivery risk
- Improved coordination across suppliers
- Stronger governance and assurance
- Better protection of organisational knowledge
- Clear accountability throughout transition
- More predictable transition outcomes
- Smoother onboarding of new cloud services
