Data Platforms, Analytics, And Information Management

This category addresses the growing need to treat data as a strategic asset rather than a by-product of systems. Common problems include fragmented data platforms, poor data quality, unclear ownership, and limited trust in analytics outputs.

Our approach integrates platform architecture, governance, and analytics enablement. We design modern cloud data platforms alongside clear information management frameworks, ensuring that data is accessible, secure, and fit for purpose.

Clients gain reliable data foundations that support analytics, reporting, and decision-making. This improves insight, reduces manual effort, and enables more confident use of data across the organisation.

Data Visualisation Standards And Dashboard Rationalisation

Data Platforms, Analytics, and
Information Management

This service supports organisations in improving the quality and governance of dashboards and visual analytics. Wiz Digital defines visualisation standards and rationalises existing dashboards to ensure reporting outputs are clear, accessible, consistent, and aligned with organisational objectives and public sector reporting expectations.

Service Overview

- Definition of data visualisation and design standards
- Inventory and assessment of existing dashboards
- Identification of duplication and low-value dashboards
- Recommendations for consolidation and rationalisation
- Visual design and usability principles
- Accessibility and inclusion considerations
- Alignment with analytics and governance standards
- Definition of target dashboard structures
- Prioritised recommendations for improvement
- Clear visualisation standards documentation

Service Features

- Clearer and more effective reporting outputs
- Improved confidence in dashboard insights
- Reduced duplication and complexity
- Better accessibility and usability
- Stronger governance of analytics assets
- Reduced maintenance and support effort
- Improved user experience
- Clear guidance for future visualisations
- Better alignment with organisational objectives
- Sustainable approach to dashboard management
