

Your Catalyst For The
Next Digital Horizon

Wiz Digital Services Limited

G-Cloud 15

Service Definition Document : Databricks

Performance Tuning and Optimisation

Classification: Public

Lot 3 – Cloud Support Services

**Wiz Digital Is A Digital Firm That Transforms
Data, AI, And Cloud Into Secure, Scalable
Products And Services.
Delivered At Speed, Engineered For Tomorrow.**

Our Mission

We Empower Organisations By Engineering Secure, Scalable Innovation That Unlocks Growth, Sharpens Efficiency And Delivers Lasting Impact.

Cloud Solutions That Drive Innovation

AI Solutions

Pilot Programs,
Automation,
and Analytics/Reporting

Data Services

Governance, Quality,
Migrations, MDM, and
Insights/Reporting

Cloud Infrastructure

Migration, Modernisation,
Managed Services, and
Deployments

Modernisation

Micro-Services,
Development, Low Code,
CRM and Architectures

Managed Services

Monitoring and
Maintenance, Application
Support, and Security

Advisory

Strategy, Change and
Process Management,
and Risk Mitigation

Delivery That Ignites Transformation

Custom Pods

A laser-focused squad, built just for your mission.

- Hand-picked cross-functional talent; Budget surety right from the start
- Flexes in size as scope evolves—no stranded bench

Embedded Teams

Our experts, fully woven into your culture.

- Operate inside your tool-chain & ceremonies
- Knowledge transfer baked in—capability uplift for your staff

Managed Services

We Run & optimise, while you focus on growth

- 24 × 7 monitoring with SLA-backed response
- Continuous improvement pipeline (cost, performance, security)

Project Delivery

Fixed outcomes against clear milestones.

- Scope, timeline, budget locked in upfront
- Dedicated delivery lead + risk registry
- Stage-gate sign-offs ensure zero surprise overruns

G-Cloud 15 Service Offerings

- 1 Cloud Strategy, Architecture, and Advisory
- 2 Cloud Programme, Portfolio, and Delivery Governance
- 3 Cloud Migration and Modernisation Planning
- 4 Cloud Foundation and Platform Enablement
- 5 Cloud Migration and Transition Delivery Support
- 6 Data Platforms, Analytics, and Information Management
- 7 Cloud Security, Risk, and Assurance
- 8 Cloud Financial Management and Sustainability
- 9 Managed Cloud Services, and Operational Support
- 10 Quality Assurance, Testing and Service, Validation
- 11 Training, Enablement, and Knowledge Transfer
- 12 AI Platform Enablement, Governance, and Operations

6

Data Platforms, Analytics, And Information Management

This category addresses the growing need to treat data as a strategic asset rather than a by-product of systems. Common problems include fragmented data platforms, poor data quality, unclear ownership, and limited trust in analytics outputs.

Our approach integrates platform architecture, governance, and analytics enablement. We design modern cloud data platforms alongside clear information management frameworks, ensuring that data is accessible, secure, and fit for purpose.

Clients gain reliable data foundations that support analytics, reporting, and decision-making. This improves insight, reduces manual effort, and enables more confident use of data across the organisation.

Databricks Performance Tuning And Optimisation

Data Platforms, Analytics, and
Information Management

This service helps organisations improve the performance and efficiency of Databricks platforms. Wiz Digital assesses workloads, configurations, and usage patterns to identify performance bottlenecks and define optimisation actions that improve reliability, scalability, and cost efficiency while aligning with governance and public sector requirements.

Service Overview

- Assessment of Databricks workloads and usage patterns
- Review of cluster sizing and configuration
- Analysis of job, pipeline, and query performance
- Guidance on data layout and storage optimisation
- Cost and performance trade-off considerations
- Reliability and stability improvement guidance
- Definition of performance monitoring metrics
- Identification and prioritisation of optimisation actions
- Alignment with governance and operational models
- Clear optimisation documentation and handover

Service Features

- Improved performance and responsiveness of workloads
- Reduced processing delays and failures
- Better cost efficiency and resource utilisation
- Improved reliability of data pipelines
- Increased confidence in analytics services
- Clear and prioritised optimisation actions
- Reduced operational performance incidents
- Improved scalability of Databricks platforms
- Better alignment with governance controls
- Sustainable foundation for ongoing optimisation
