Cloud Migration And Transition Delivery Support

This category focuses on supporting the execution of migrations and transitions into live service. Buyers often face capability gaps, delivery risk, or coordination challenges across multiple suppliers and internal teams.

We provide hands-on delivery support across migration execution, cutover, integration, and service transition. Our role is to stabilise delivery, manage risk, and ensure that operational readiness is achieved before services go live.

The value lies in smoother transitions, fewer incidents, and faster stabilisation post-migration. Clients retain control while benefiting from experienced delivery support at critical points in the journey.

Workload Migration Delivery Support (Applications And Platforms)

Cloud Migration and Transition Delivery Support

This service supports organisations during the execution of cloud migrations. Wiz Digital provides structured delivery support to coordinate activities, manage risks and dependencies, and support cutover, ensuring applications and platforms transition to cloud environments in a controlled and well-governed manner.

Service Overview

- Coordination of application and platform migration activities
- Support for migration execution and sequencing
- Management of dependencies and integrations
- Cutover and transition planning and support
- Risk and issue management during migration
- Security and compliance validation support
- Coordination of data and identity migration activities
- Supplier and stakeholder coordination
- Migration progress tracking and reporting
- Clear migration delivery documentation and handover

Service Features

- Reduced risk during cloud migration execution
- Improved coordination across teams and suppliers
- More predictable migration timelines
- Reduced likelihood of disruption at cutover
- Improved security and compliance during transition
- Better visibility of migration progress
- Reduced rework and delays
- Improved stakeholder confidence
- Smoother transition to cloud operations
- Strong foundation for post-migration stability
