

Your Catalyst For The
Next Digital Horizon

Wiz Digital Services Limited

G-Cloud 15

Service Definition Document : Identity Security and
Privileged Access Design (PAM, JML)

Classification: Public

Lot 3 – Cloud Support Services

**Wiz Digital Is A Digital Firm That Transforms
Data, AI, And Cloud Into Secure, Scalable
Products And Services.
Delivered At Speed, Engineered For Tomorrow.**

Our Mission

We Empower Organisations By Engineering Secure, Scalable Innovation That Unlocks Growth, Sharpens Efficiency And Delivers Lasting Impact.

Cloud Solutions That Drive Innovation

AI Solutions

Pilot Programs,
Automation,
and Analytics/Reporting

Data Services

Governance, Quality,
Migrations, MDM, and
Insights/Reporting

Cloud Infrastructure

Migration, Modernisation,
Managed Services, and
Deployments

Modernisation

Micro-Services,
Development, Low Code,
CRM and Architectures

Managed Services

Monitoring and
Maintenance, Application
Support, and Security

Advisory

Strategy, Change and
Process Management,
and Risk Mitigation

Delivery That Ignites Transformation

Custom Pods

A laser-focused squad, built just for your mission.

- Hand-picked cross-functional talent; Budget surety right from the start
- Flexes in size as scope evolves—no stranded bench

Embedded Teams

Our experts, fully woven into your culture.

- Operate inside your tool-chain & ceremonies
- Knowledge transfer baked in—capability uplift for your staff

Managed Services

We Run & optimise, while you focus on growth

- 24 × 7 monitoring with SLA-backed response
- Continuous improvement pipeline (cost, performance, security)

Project Delivery

Fixed outcomes against clear milestones.

- Scope, timeline, budget locked in upfront
- Dedicated delivery lead + risk registry
- Stage-gate sign-offs ensure zero surprise overruns

G-Cloud 15 Service Offerings

- 1 Cloud Strategy, Architecture, and Advisory
- 2 Cloud Programme, Portfolio, and Delivery Governance
- 3 Cloud Migration and Modernisation Planning
- 4 Cloud Foundation and Platform Enablement
- 5 Cloud Migration and Transition Delivery Support
- 6 Data Platforms, Analytics, and Information Management
- 7 Cloud Security, Risk, and Assurance
- 8 Cloud Financial Management and Sustainability
- 9 Managed Cloud Services, and Operational Support
- 10 Quality Assurance, Testing and Service, Validation
- 11 Training, Enablement, and Knowledge Transfer
- 12 AI Platform Enablement, Governance, and Operations

7

Cloud Security, Risk, And Assurance

This category supports organisations operating under heightened security, regulatory, or public accountability requirements. Buyers often need to balance innovation with assurance, without defaulting to risk-averse stagnation.

We embed security and risk management into cloud design and operations, rather than treating them as bolt-ons. Our services cover architecture, controls, assurance activities, and audit readiness, aligned to recognised standards and government expectations.

The outcome is improved security posture, clearer risk ownership, and stronger assurance for stakeholders. Clients are able to move faster with confidence, supported by evidence-based controls and defensible security decisions.

Identity Security And Privileged Access Design (PAM, JML)

Cloud Security, Risk,
and Assurance

This service supports organisations in strengthening identity security for cloud environments. Wiz Digital designs privileged access and identity lifecycle models that reduce risk from excessive access, ensure secure management of administrative privileges, and align identity practices with organisational governance and public sector assurance requirements.

Service Overview

- Design of cloud identity security architectures
- Definition of privileged access management models
- Joiner-mover-leaver process design
- Privileged role and entitlement definition
- Application of least-privilege principles
- Credential and privileged session protection design
- Integration with cloud identity platforms
- Audit, logging, and monitoring considerations
- Alignment with security and compliance requirements
- Clear identity security documentation

Service Features

- Reduced risk from excessive or unmanaged privileges
- Stronger control of administrative access
- Improved compliance with identity policies
- Clear and auditable identity lifecycle processes
- Reduced likelihood of identity-based attacks
- Improved audit and assurance confidence
- Better visibility of privileged access
- Consistent identity security practices
- Stronger governance of cloud identities
- Sustainable foundation for secure access management
