Managed Cloud Services And Operational Support

This category covers the ongoing operation of cloud services once live. Buyers often struggle with fragmented support models, unclear responsibilities, and limited operational insight.

We provide managed services that integrate monitoring, incident management, optimisation, and continuous improvement. Services are designed to complement existing teams and suppliers, with clear service boundaries and escalation paths.

Clients benefit from improved service stability, faster issue resolution, and ongoing optimisation. Operational support becomes proactive rather than reactive, supporting service reliability and user confidence.

Cloud Technical Advisory Retainer

Managed Cloud Services and Operational Support

This service provides flexible access to cloud expertise through an advisory retainer. Wiz Digital supports organisations with architecture guidance, technical assurance, and issue resolution, enabling informed decision-making and risk reduction across cloud initiatives without the overhead of full delivery engagements.

Service Overview

- On-demand access to experienced cloud specialists
- Advisory support for architecture and design decisions
- Independent review and technical assurance
- Diagnosis and guidance on technical issues
- Optimisation advice across security, cost, and performance
- Advisory input on compliance and governance
- Support for vendor and solution evaluation
- Decision support and trade-off analysis
- Flexible engagement and consumption model
- Clear advisory outputs and recommendations

Service Features

- Immediate access to trusted cloud expertise
- More confident and informed technical decisions
- Reduced risk of costly design or delivery errors
- Independent, objective advisory perspective
- Faster resolution of complex technical issues
- Improved assurance of cloud initiatives
- Flexible support tailored to changing needs
- Better alignment with cloud best practices
- Stronger governance and decision-making
- Sustainable access to expert cloud advice
