Cloud Foundation And Platform Enablement

This category covers the design and implementation of the core cloud platforms on which services depend. Without a strong foundation, organisations often experience inconsistent security, spiralling costs, and operational fragility.

We design and implement cloud foundations that are secure by default, scalable, and aligned to organisational operating models. Platform enablement is automated, policy-driven, and designed to support both central governance and decentralised delivery teams.

Clients gain a stable, reusable platform that accelerates onboarding of workloads, improves security posture, and reduces operational overhead. Foundations are built to evolve, avoiding brittle designs that constrain future change.

AWS Landing Zone And Control Tower Enablement

Cloud Foundation and Platform Enablement

This service provides a secure and governed foundation for adopting Amazon Web Services. Wiz Digital designs and enables AWS landing zones using Control Tower to establish account structures, security guardrails, and operational foundations that support safe, compliant, and scalable cloud adoption aligned with public sector assurance expectations.

Service Overview

- Design of AWS landing zone architecture
- Setup and configuration of AWS Control Tower
- Definition of account and organisational structures
- Network and connectivity foundation configuration
- Identity and access baseline implementation
- Security, compliance, and policy guardrails
- Logging, monitoring, and audit foundations
- Infrastructure-as-code enablement
- Validation and readiness checks
- Clear documentation and handover

Service Features

- Secure and compliant AWS foundations
- Reduced risk during early AWS adoption
- Faster and more consistent workload onboarding
- Improved security and governance controls
- Reduced likelihood of configuration errors
- Improved readiness for migration activities
- Stronger operational foundations
- Easier coordination across teams and suppliers
- Scalable approach for future expansion
- Increased confidence in AWS environments
