- 9 Managed Cloud Services, and Operational Support
- 10 Quality Assurance, Testing and Service, Validation
- 11 Training, Enablement, and Knowledge Transfer
- 12 AI Platform Enablement, Governance, and Operations

7

Cloud Security, Risk, And Assurance

This category supports organisations operating under heightened security, regulatory, or public accountability requirements. Buyers often need to balance innovation with assurance, without defaulting to risk-averse stagnation.

We embed security and risk management into cloud design and operations, rather than treating them as bolt-ons. Our services cover architecture, controls, assurance activities, and audit readiness, aligned to recognised standards and government expectations.

The outcome is improved security posture, clearer risk ownership, and stronger assurance for stakeholders. Clients are able to move faster with confidence, supported by evidence-based controls and defensible security decisions.

Government Cloud Assurance And Compliance Readiness Support

Cloud Security, Risk,
and Assurance

This service supports organisations preparing cloud services for government assurance and compliance. Wiz Digital helps interpret assurance frameworks, assess readiness, and prepare structured evidence and documentation, enabling organisations to demonstrate compliance confidently with public sector cloud, security, and risk management requirements.

Service Overview

- Interpretation of government cloud assurance frameworks
- Assessment of cloud compliance readiness
- Mapping of controls to assurance requirements
- Identification of required evidence and artefacts
- Gap analysis against compliance standards
- Definition of remediation actions
- Alignment with organisational risk management
- Preparation of assurance documentation
- Support during assurance and assessment activities
- Clear compliance readiness reporting

Service Features

- Improved confidence in government assurance readiness
- Reduced risk of compliance issues
- Clear visibility of assurance gaps
- Faster and more efficient assurance preparation
- Improved engagement with assessors
- Better alignment with public sector expectations
- Reduced delays in service approval
- Stronger governance of compliance activities
- More predictable assurance outcomes
- Sustainable foundation for ongoing compliance
