Cloud Migration And Transition Delivery Support

This category focuses on supporting the execution of migrations and transitions into live service. Buyers often face capability gaps, delivery risk, or coordination challenges across multiple suppliers and internal teams.

We provide hands-on delivery support across migration execution, cutover, integration, and service transition. Our role is to stabilise delivery, manage risk, and ensure that operational readiness is achieved before services go live.

The value lies in smoother transitions, fewer incidents, and faster stabilisation post-migration. Clients retain control while benefiting from experienced delivery support at critical points in the journey.

Cutover Planning, Runbooks And Rollback Design

Cloud Migration
and Transition
Delivery Support

This service supports safe and controlled transitions to cloud services by designing cutover plans, operational runbooks, and rollback approaches. Wiz Digital helps organisations prepare for critical transition events, ensuring activities are coordinated, risks are managed, and services can be recovered quickly if required.

Service Overview

- Design of cutover strategy and sequencing
- Development of detailed cutover plans
- Creation of operational runbooks
- Definition of roles and responsibilities
- Design of rollback and recovery approaches
- Identification of risks and contingencies
- Validation of dependencies and readiness
- Planning of communications and coordination
- Support for rehearsals and dry runs
- Clear documentation and handover

Service Features

- Reduced risk during migration cutovers
- Clear coordination during transition events
- Improved confidence for stakeholders
- Faster recovery from potential issues
- Reduced likelihood of service disruption
- Better preparedness for go-live
- Stronger operational readiness
- Improved governance of transitions
- More predictable outcomes
- Smoother transition into live operations
