Managed Cloud Services And Operational Support

This category covers the ongoing operation of cloud services once live. Buyers often struggle with fragmented support models, unclear responsibilities, and limited operational insight.

We provide managed services that integrate monitoring, incident management, optimisation, and continuous improvement. Services are designed to complement existing teams and suppliers, with clear service boundaries and escalation paths.

Clients benefit from improved service stability, faster issue resolution, and ongoing optimisation. Operational support becomes proactive rather than reactive, supporting service reliability and user confidence.

Cloud Optimisation Health Checks

Managed Cloud
Services and
Operational Support

This service provides a structured review of cloud environments to identify improvement opportunities across security, cost, and performance. Wiz Digital conducts evidence-based health checks that highlight risks and inefficiencies and produce clear, prioritised recommendations aligned with organisational governance and public sector expectations.

Service Overview

- Review of security configurations and controls
- Analysis of cloud spend and cost efficiency
- Assessment of performance and resource utilisation
- Comparison against recognised cloud best practices
- Identification of risks and optimisation opportunities
- Assessment of impact and remediation effort
- Prioritisation of recommended improvement actions
- Alignment with ownership and governance models
- Evidence-based reporting of findings
- Clear health check documentation

Service Features

- Clear insight into cloud health and efficiency
- Reduced exposure to security and cost risks
- Improved performance and utilisation
- Actionable and prioritised improvement roadmap
- Improved reliability of cloud services
- Better alignment with best practices
- Reduced likelihood of avoidable incidents
- Stronger governance of cloud environments
