# 1

## Cloud Strategy, Architecture, And Advisory

This category covers the strategic and architectural decisions that determine whether cloud adoption delivers lasting value or creates long-term complexity. Buyers typically engage these services when facing fragmented estates, unclear cloud direction, competing stakeholder priorities, or regulatory and risk constraints that make off-the-shelf approaches unsuitable.

Our approach is grounded in pragmatic architecture and decision support. We work with senior stakeholders to clarify objectives, constraints, and success measures, then translate these into clear architectural principles, target states, and roadmaps. Advice is independent, evidence-led, and aligned to delivery reality rather than aspirational future states.

The outcome is decision clarity. Clients gain a defensible cloud strategy, a coherent architectural direction, and a shared understanding of trade-offs across cost, risk, capability, and speed. This creates a stable foundation for all subsequent cloud activity and reduces rework later in delivery.

# Cloud Business Case, Benefits And Value Realisation Plan

Cloud Strategy,  
Architecture, and  
Advisory

This service supports organisations in building a robust, evidence-based business case for cloud adoption. Wiz Digital assesses costs, benefits, risks, and assumptions to support investment decisions and defines how value will be tracked and realised over time, aligning cloud initiatives with organisational priorities and public sector accountability expectations.

## Service Overview

- Assessment of cloud investment drivers and objectives
- Identification of financial and non-financial benefits
- Cost analysis and value assumptions development
- Documentation of key assumptions and constraints
- Risk and sensitivity analysis
- Comparison of delivery and investment options
- Definition of benefits ownership and accountability
- Development of value realisation measures
- Benefits tracking and reporting approach
- Clear and auditable business case documentation

## Service Features

- Clear and defensible cloud investment rationale
- Improved confidence in approval decisions
- Better alignment between spend and outcomes
- Reduced risk of benefits not being realised
- Clear ownership of benefit delivery
- Improved transparency and accountability
- Stronger ongoing value management
- Better-informed stakeholder engagement
- Clear success measures for cloud initiatives
- Improved return on cloud investment
