The Challenges

Profile's AI.Adaptive empowers any financial institution to unlock the power of data with AI-driven insights, streamlined workflows, and next-generation customer experiences for their clients.

Financial institutions today are drowning in data. Extracting meaningful insights and making data-driven decisions can be a time-consuming and complex process. Traditional methods are often limited, requiring specialised skills and pre-defined reports. This can lead to missed opportunities, inefficiencies, and ultimately, a negative impact on the customer experience.

This challenge is felt across various sectors:

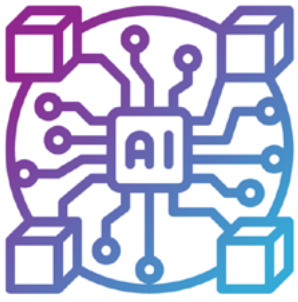

Retail/Commercial Banks: Manual processes for fraud detection and loan processing lead to inefficiencies and delays. Additionally, limited customer insights hinder the ability to personalise experiences and offerings. Further, managing risk for loan approvals requires careful analysis, but traditional methods can be cumbersome. Ensuring regulatory compliance adds another layer of complexity.

Investment Banks: Advanced analytics are crucial for customer segmentation, portfolio management, and making informed investment decisions. However, current solutions may lack the sophistication needed to fully leverage available data.

Wealth and Fund Management Firms: Providing personalised investment recommendations, AI-driven risk analysis for managing fund assets and crafting effective portfolio management strategies hinge on deep customer understanding. Limited access to actionable data insights hinders the ability to deliver these services effectively.

Insurance Companies: Accurate risk assessment, effective fraud detection, and streamlined claims processing are essential for profitability. But outdated systems can make it difficult to achieve these goals.

In this environment, financial institutions need a solution that empowers them to harness the power of data and gain a competitive edge.

The Solution

AI.Adaptive adopts an LLM-agnostic strategy enabling direct and flexible interaction with Profile's Axia Suite, Finuevo Suite, Acumen.plus, Centevo Suite, RiskAvert, and RegiStar platforms and delivers fintech innovation by seamlessly integrating cutting-edge AI with your existing financial technology infrastructure.

It can address key pain points, offering a comprehensive solution that transforms challenges into opportunities for growth, security, and operational excellence.

Key Features and Benefits

Effortless Data Exploration

It eliminates the complex queries and predefined reports, allowing users to ask questions in plain English, written or spoken, resulting in tailored reports and insights. This empowers teams to make informed decisions effortlessly.

Automated Workflows

It turns challenges into opportunities by automating workflows. By streamlining operations, the solution optimises resources, allowing financial institutions to focus on strategic initiatives and business growth.

Fraud Detection & Prevention

It continuously analyses vast amounts of data to help you identify suspicious patterns and prevent fraud attempts. This proactive approach ensures immediate intervention, safeguarding valuable assets.

Enhanced Risk Management

It provides advanced analytics for a deeper understanding of risk factors. This aids in making well-informed decisions in critical areas, minimising financial risks.

Security and Privacy

It maintains the highest security standards with robust data encryption, access controls, and user authentication protocols. Your sensitive financial data remains protected while complying with industry regulations.

Flexibility and Scalability

It adapts to your evolving needs. Our solution scales seamlessly to accommodate growing data volumes and integrates effortlessly with your existing infrastructure, future-proofing your financial institution's data analysis capabilities.

Financial institutions are a complex ecosystem, and different roles have unique data needs. AI.Adaptive understands these needs and can empower each team member to be more efficient and effective. This section provides targeted information tailored to various roles within your organisation. Explore how AI.Adaptive can transform your approach to data analysis, no matter your position:

C-level executives: Gain strategic insights to drive growth and make informed decisions about the future of your financial institution.

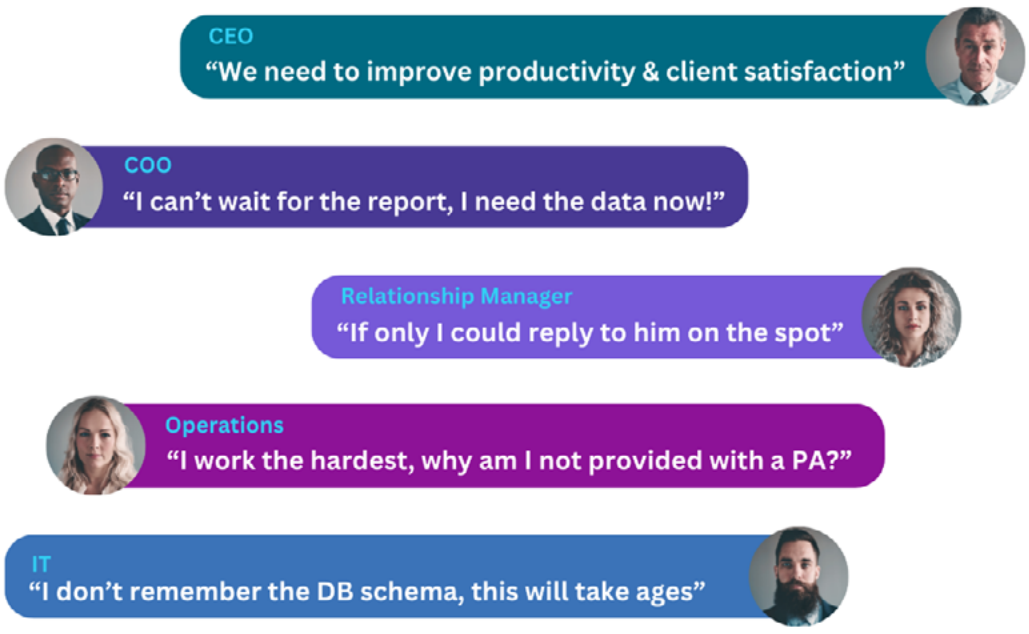

COO/Operations: Streamline workflows, improve operational efficiency, and optimise resource allocation.

Wealth/Relationship Managers: Deliver exceptional customer service with personalised recommendations and data-driven insights.

Risk Management: Enhance risk assessment, ensure regulatory compliance, and proactively mitigate potential issues.

IT: Leverage a future-proof solution that integrates seamlessly with your existing infrastructure and scales to meet evolving data demands.

By empowering every team member with the power of AI-driven data analysis, AI.Adaptive unlocks the full potential of your financial institution.

Key differentiators

We continuously invest in innovation and focus on user-centric design to provide unparalleled features tailored to your needs.

Tailored Support and Training

Differentiating ourselves through dedicated support and training programs, we ensure that users maximise the potential of the AI.Adaptive solution. Our team is committed to assisting users in harnessing the full capabilities of our solution, providing ongoing support, and offering training sessions to guarantee a smooth and efficient integration into your workflows.

Continuous Innovation

Stay ahead with Profile's commitment to continuous innovation. We regularly update our AI.Adaptive solution with the latest advancements in natural language processing and machine learning, ensuring that your data interaction remains at the forefront of technology.

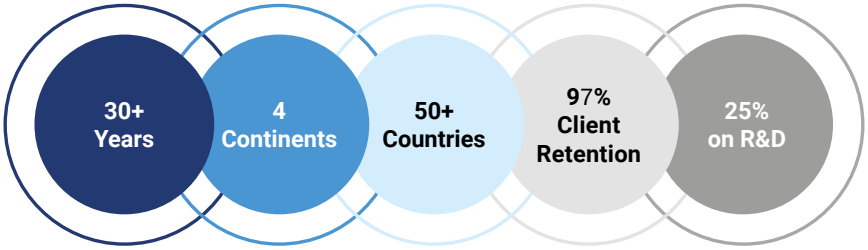

Versatile Solution

Whether used as a standalone solution or integrated with other Profile platforms, our AI.Adaptive solution ensures a tailored, user-friendly experience for database interaction.

Harmonious Integration

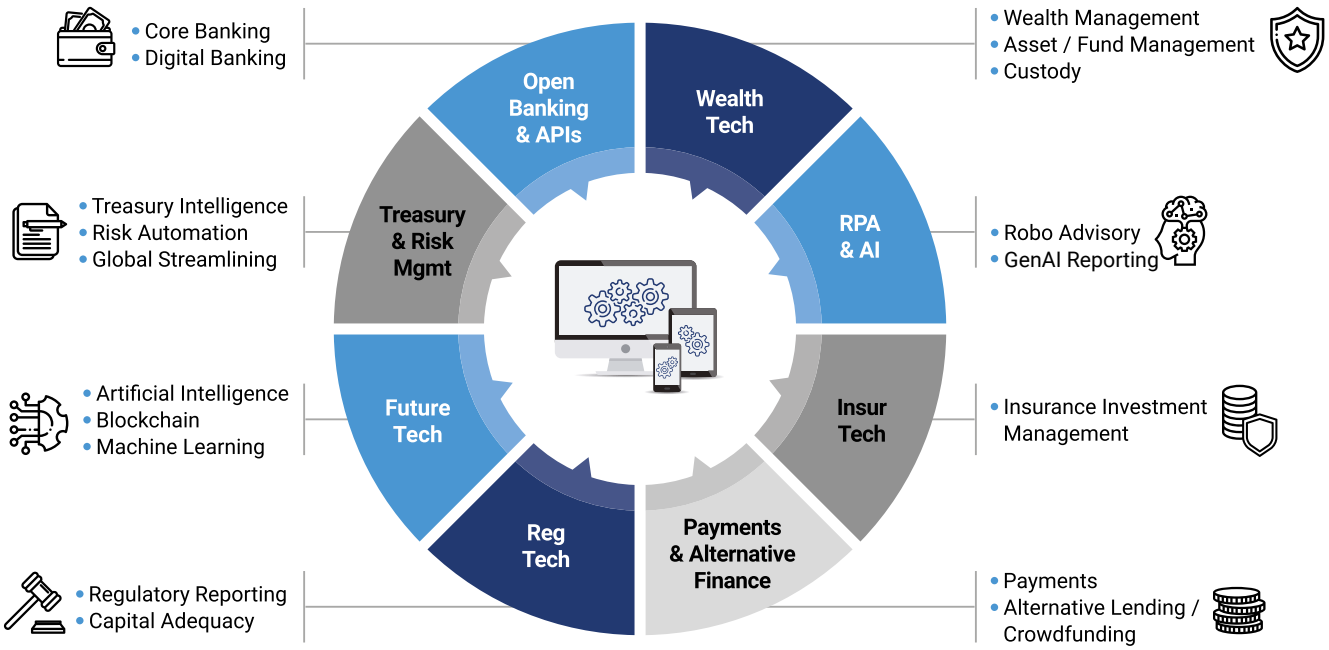

Seamlessly integrate with Profile's Fintech platforms for a unified user experience, maximising operational efficiency across various organisational functions. It also operates as standalone with various Business Intelligence and Data Warehousing (BI/DW) subsystems from other sources.

About Profile Software

Founded in 1990, Profile Software is a pioneering world-class Financial solutions provider for the modern Banking and Investment Management sectors, delivering innovative client-centric platforms with a successful track record of implementations. With presence across 50+ countries, Profile Software is acknowledged as an established and trusted partner, offering a wide spectrum of award-winning and market-proven software.

Covering all financial market trends

The company's solutions are recognised and approved by leading analysts as they empower institutions worldwide to align their business and IT strategies, while providing the necessary business agility to proactively respond to the evolving market challenges.

Profile Software's agile solutions, developed on modern technologies (e.g. mobile, cloud, AI) offering various deployment methods (e.g. BPO, SaaS) and competitive functionality, cover all major business areas pertinent to the Financial Services Industry. They can be easily implemented in small or large institutions, delivering unique flexibility, compliance with the applicable legal and regulatory frameworks (e.g. MiFID II, PSD2, GDPR, Basel III / IV, IFRS9, etc.), while offering unique user / customer experience.

Profile Software delivers Professional Services to its clients which are included in its turn-key solution proposition to completely cover their requirements, from project commencement to go-live.
