

BEYOND DIGITAL.IO

IT CONSULTANCY SPECIALISING IN HEALTHCARE

ABOUT US

Beyond Digital are a boutique consultancy with a carefully sourced team of professional seasoned IT associates, possessing a wealth of experience and diverse skill sets.

Our team is dedicated to enhancing IT services in the UK healthcare industry.

Our passion for technology and commitment to excellence drive us to deliver innovative solutions that improve patient care, streamline operations, ensure regulatory compliance and future proof the organisation.

With a deep understanding of the unique challenges and opportunities within healthcare, we partner with our clients to transform their IT landscape and achieve their strategic goals.

With our extensive IT background, we have a strong network of amazing professionals who can assist in delivering various services for you.

This includes network specialists, security experts, infrastructure specialists, cyber specialists, Test Managers and more.

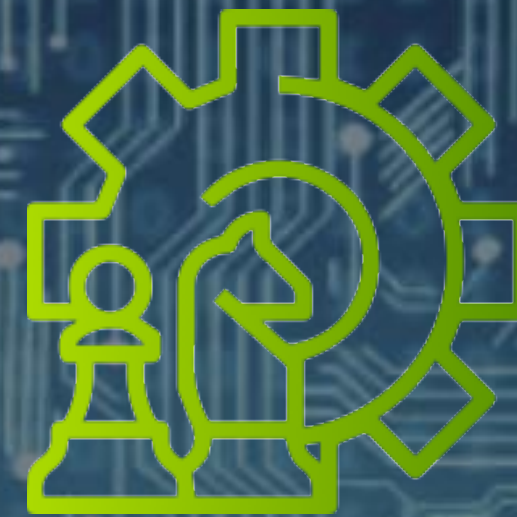

OUR CORE SERVICES

Our services can be customised to meet your needs.

You have the flexibility to choose specific components of a core service, the entire suite of services, or a personalised blend that aligns perfectly with your requirements.

Each service is interlinked and complements the others seamlessly.

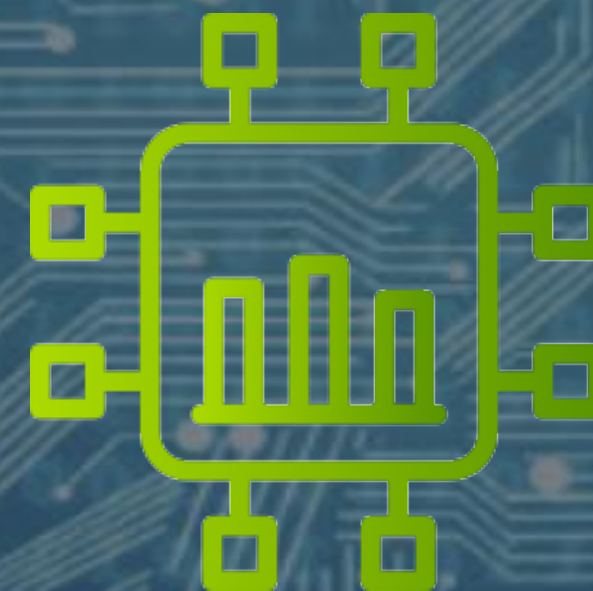

We can work with you to understand which services will help you achieve your goals.

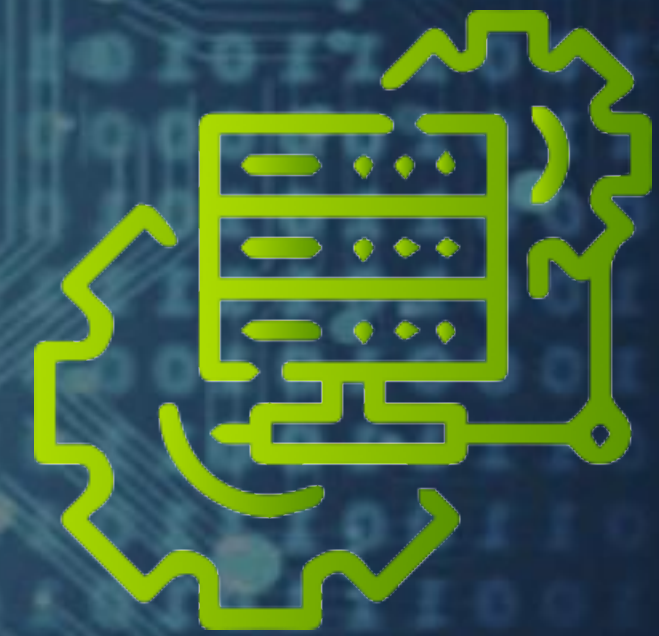

IT STRATEGY

ANALYSIS

ARCHITECTURE

**PROGRAMME
MANAGEMENT**

IT STRATEGY

DATA

Is there a clear understanding of how the information being processed by the solution is acquired, queried, stored and protected?

SUPPORT

Are the necessary skills and knowledge present within the business to maintain the technology and respond to user requests?

SECURITY

What mechanisms must be in place to ensure the systems within the solution remain sufficiently resilient to threats and exploits?

TECHNOLOGY

How can we piece together digital components in a way that is resistant to failure, whilst minimising diversity and single use?

SERVICE

How do customers use what the solution offers and what measures will the business take to ensure its continued availability?

STRATEGY

Does the way this solution is constructed support the long-term objectives of the business or work towards realising its vision?

ANALYSIS SERVICES

To craft the optimal IT strategy for your organisation, we will consider the following:

REQUIREMENTS ELICITATION

Requirements Elicitation is about understanding an organisation's needs, documenting them clearly using appropriate tools and methods, fostering shared understanding, aligning team efforts, and empowering successful project delivery through solid requirements.

GAP ANALYSIS

Comparing current performance with goals to identify areas for improvement by analysing processes, identifying gaps, and recommending actions to help organisations achieve objectives more effectively.

DATA ANALYSIS

Analysing data involves examining, cleaning, transforming, and modelling data to uncover insights, patterns, correlations, and trends, aiding organisations in making informed, data-driven decisions.

Comparison of Performance by Year

Description	2018	2019	2020
Product 1	25	50	25
Product 2	50	100	150
Product 3	100	200	250

PROCESS MAPPING

Process mapping is the visual representation of a workflow or process. It involves outlining each step, task, and decision point to understand and analyse how a process operates. This helps identify inefficiencies, streamline operations and improve overall performance.

ROOT CAUSE ANALYSIS

Problem-solving method that uncovers root causes for effective, long-term solutions.

DELIVERY & IMPLEMENTATION SUPPORT

By leveraging business understanding, projects align with objectives, address challenges, bridge stakeholder gaps, facilitate clear communication, and deliver solutions meeting business goals.

ARCHITECTURE SERVICES

To craft the optimal IT strategy for your organisation, we will consider the following:

EXTERNAL AWARENESS

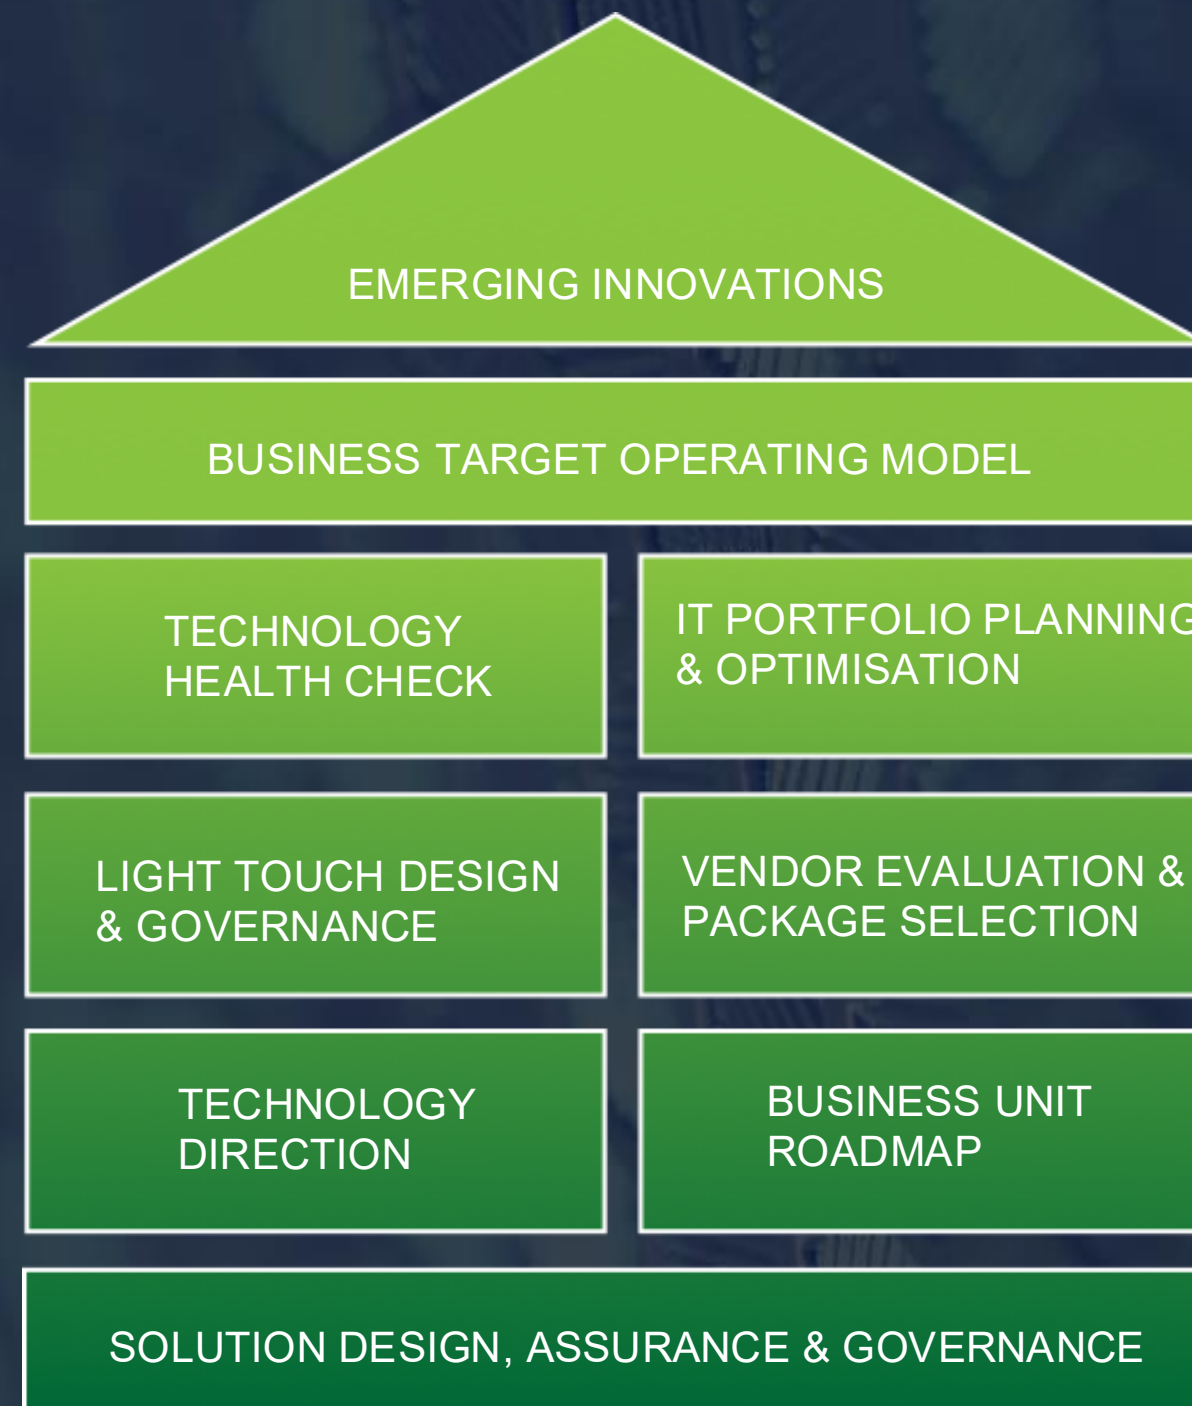

- Understanding industry trends and vendor advancements
- Monitor Industry developments closely
- Conduct a specialised, one time study on a specific area of interest

CONSULTANCY

- Technology assessments
- Evaluate operational risks
- Cyber and security assessments
- Insights on technology standards and advancements
- Guidance on cloud capabilities
- Comprehensive solution design service

ENTERPRISE ARCHITECTURE

- Aligning business strategies with technology investments and target operating models (TOM)
- To guarantee excellent TOMs, we follow industry standard Enterprise Architecture methodologies and guidelines.

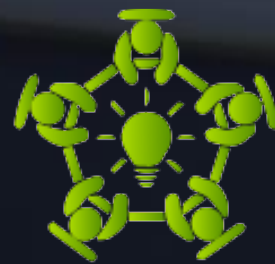

DELIVERY

- Developing strategic roadmaps aligning business architecture with technology
- Optimising Investments across departments
- Simplification, cost reduction, and increased value
- Guidance on third party products
- Creating tailored assessment criteria aligned with strategy
- Ensuring accountability of design from conception through build and into delivery

PROGRAMME MANAGEMENT

PLANNING & EXECUTION

Initial Consultation:

We begin by gaining a thorough understanding of your organisation's goals, challenges, and requirements.

This allows us to tailor our project management approach and choose the appropriate methodology, whether it's Agile, Waterfall, or another framework.

Detailed Planning:

We create a comprehensive project plan detailing the scope, timelines, milestones, resources, and budget. Our meticulous planning process ensures that every aspect of the project is considered and aligned with your strategic objectives. Also allowing us to align our wide network of experienced associates to support your organisation's needs.

STAKEHOLDER ENGAGEMENT

Regular Communication:

We maintain open lines of communication with all stakeholders through regular meetings, progress reports, and updates. This keeps everyone aligned and informed about the project's status and any changes that may occur.

Stakeholder Involvement:

We engage stakeholders throughout the project lifecycle to gather feedback, address concerns, and ensure their needs and expectations are met.

QUALITY ASSURANCE

Standards and Best Practices:

We adhere to industry standards and best practices to deliver high-quality outcomes. Compliance with healthcare regulations and guidelines is a top priority.

Testing and Validation:

We implement rigorous testing and validation processes to ensure the solution meets all requirements and performs reliably in its intended environment.

Risk Management:

We identify potential risks early and develop mitigation strategies to ensure the project's success. This involves regular risk assessments and proactive management to minimise any negative impacts.

CHANGE MANAGEMENT

Change Control:

We employ a structured change control process to manage any modifications to the project's scope, schedule, or resources. This ensures that changes are thoroughly assessed, approved, and documented.

Training and Support:

We provide comprehensive training and support to ensure a smooth transition and successful adoption of new systems or processes. This includes developing training materials and conducting sessions for end-users.

Service Management:

We ensure that the service is fully supported once it goes live and that all project closure activities are completed.

WHY WORK WITH US?

We firmly believe that an exceptional IT strategy, analysis, architecture, and delivery team are crucial for a successful digital infrastructure.

Our specialised team assists NHS trusts in implementing change without overburdening already stretched staff .

We prioritise understanding your organisation's true needs to offer effective solutions

SPECIALISED EXPERTISE

With our network of experts we provide targeted support, ensuring successful change implementation without overburdening your core staff.

STRATEGIC ALIGNMENT

Our actions align with your organisation's true needs and goals through thorough analysis and strategic thinking.

FUTURE PROOF

Ensuring technology solutions are scalable, resilient, cost efficient, and secure.

TECHNOLOGY INTEGRATION

Aligning technology selection and utilisation to support your business strategy and objectives.
