

Digital Investigations Platform

CCL's long pedigree of partnership with legal clients, leading law enforcement, government, and corporate clients means that we understand the varied needs of different sectors and enables us to guide and support our clients in these complex matters. A consultative approach, using best practice products and forensic methodologies is in our DNA; and more than 30 years of really listening to our clients, means we can build and develop solutions to suit their individual requirements.

This service has been designed specifically to support digital investigations with a robust and defensive process. It allows investigating teams to quickly and conveniently review digital data from a remote location and without the need for specialist equipment.

1. Data preservation

- Devices submitted to CCL, CCL attend on-site location or data is collected remotely
- Identification, recovery & preservation of electronic data to highest digital forensic standards
- Multitude of data sources including personal computers, mobile phones, servers & cloud storage

2. Processing

- Processing of all collected data by CCL using the most relevant forensic software
- Ability to handle large volumes of data from a multitude of sources
- Extraction of all content & recovery of deleted data where possible
- Removing irrelevant files, identifying relevant material, de-duplicating data to reduce review time

3. Analysis

- Data analysis using comprehensive keyword & date range filtering
- Data evaluation utilising client requirements & relevant prosecution or defence team requests
- Identification of associated external media usage, browser usage, cloud usage etc
- Advanced review enhancement techniques including translation, transcription and summarisation of documents
- Full support of CCL's digital forensic analysts

4. Review

- Gain access to all electronic & hard copy scanned information in a central location
- Secure, remote access via a web browser, easy to use
- Material is readily accessible to explore lines of enquiry
- Simultaneous access to data allowing concurrent review by all parties
- Provide segregated pools of data to independent counsel for Legal Professional Privilege consideration

5. Report

- Production of a defensible report outlining the handling & processing of electronic data
- Production of evidence & data for disclosure in a user-friendly manner

Benefits of using CCL's Digital Investigation Platform:

- Reduced costs and time
- Easy to use
- Data in one place
- Robustly handling large data volumes
- Remote reviewing
- LPP, disclosure and structured review
- All supported by CCL's experienced team

CCL's Discovery team provide consultancy and support throughout of all stages of data handling, processing, analysis and review to ensure all data is dealt with in a defensible manner.
