January 2026

Cyber Essentials, Cyber Essentials plus,
Managed Security Services, NCSC
CHECK (ITHC) Penetration Testing, CREST
and CHECK Penetration Testing, Red
Team services, Secure Code Review

Pricing Information

Cyber Essentials

£950

One-off external vulnerability scan (up to 50 IPs) - £495**

Free optional external vulnerability scan (up to 20 IPs)

Reduced cost option for up to 65 IPs - £495

Cyber Essentials Plus

Pricing for Cyber Essentials Plus is based on organisation size. The example provides costs for an organisation of the size shown. We can provide services for organisations of all sizes, and pricing will be tailored to your specific requirements and environment.

Standard price includes 65 live external IP addresses, 10 end user devices, 2 cloud services, 2 servers

There is an additional fee of £950 for each additional 50 live external IP addresses in scope

There is an additional fee of £950 for each additional 15 user devices in scope

Managed Security Services

£885 per month

Pricing for managed cyber security services is based on organisation size. The example provides costs for an organisation of the size shown. We can provide services for organisations of all sizes, and pricing will be tailored to your specific requirements and environment.

Phishing Assessments

Vulnerability Scanning

Cyber Security Awareness Training

Dark Web Monitoring

Quarterly Progress Reviews

NCSC CHECK (ITHC) Penetration Testing

£950 - £1,400 per day

Our certified security consultants can assess all systems including web applications, mobile applications, wireless, infrastructure and cloud services. Our tailored services help identify your unique threats and vulnerabilities.

For more detailed information regarding the elements of an assessment, please refer to the table at the end of this document. An assessment can encompass individual or all of these items to fulfil your requirements.

CREST and CHECK Penetration Testing

£950 - £1,400 per day

Our certified security consultants can assess all systems including web applications, mobile applications, wireless, infrastructure and cloud services. Our tailored services help identify your unique threats and vulnerabilities.

For more detailed information regarding the elements of an assessment, please refer to the table at the end of this document. An assessment can encompass individual or all of these items to fulfil your requirements.

*IASME certification cost to be added – cost varies depending on size of business

** Additional IPs or recipients can be added at extra cost

Red Team Services

£1,400 - £1,800 per day

Red Teaming uses sophisticated techniques to identify the business attack surface and exploit any weaknesses that are identified, simulating a modern threat actor who may attempt to compromise your organisation. Any vulnerabilities that are discovered will be exploited if they provide a legitimate path to the engagement's pre-defined objectives.

Our Red Team services are scoped per assessment inline with your objectives to deliver the most realistic attack scenarios using current Tools, Techniques and Procedures (TTPs) that are used by today's APTs.

Secure Code Review

£950 - £1,400 per day

CCL delivers code audits by combining a manual review with automated code review tools to ensure comprehensive coverage. We endeavour to involve human intelligence to find flaws such as application logic, design, structural issues that may go unnoticed with just an automated tool.

For more detailed information regarding the elements of an assessment, please refer to the table at the end of this document. An assessment can encompass individual or all of these items to fulfil your requirements.

NCSC CHECK IT Health Check (ITHC) Penetration Testing Scoping Detail

Scope Item	Location	Days
Build Reviews: Configuration and vulnerability review against an individual workstation / server in line with CIS benchmarks	Onsite	0.5 days per system
Internal Infrastructure Testing: Internal testing from a network perspective to identify any open ports and vulnerabilities present on the systems within the environment	Onsite	1 day per 100 IP addresses
External Infrastructure Testing: External testing from a network perspective to identify any open ports and vulnerabilities present on the systems exposed externally	Remote	1 day per 15 IP addresses
Network Device Configuration Reviews: Static configuration review against network devices within the environment	Onsite / Remote	0.5 days per network device
Web Application Testing: Authenticated testing of a web application to identify any security weaknesses and business logic flaws	Onsite / Remote	1 day per 10 interactive pages
Wireless Network Testing: Security testing against a wireless network to identify any weaknesses which could be exploited. Note: CCL also offers Leakage Testing and Rogue Access Point Testing.	Onsite	0.5 per SSID
Database Configuration Reviews: Configuration review against CIS benchmarks to identify configuration weaknesses within the database	Onsite / Remote	0.5 days per database
Mobile Application Pen Testing: Authenticated testing of a mobile application to identify any security weaknesses and business logic flaws. Note: This is per unique build eg. An application developed for both iOS and Android would require this time each.	Onsite / Remote	1 day plus 1 per day per 10 interactive screens
Cloud Configuration Review: Configuration review of AWS / Azure environments against CIS benchmarks.	Remote	0.5 days per instance
