

Delta Technology Services – G-Cloud 15 Pricing Document

1. Pricing Overview

Delta Technology Services provides cloud consultancy, technical delivery, and specialist advisory services. Pricing is structured to offer transparent daily rates while supporting both agile time-and-materials and fixed-price scoped engagements.

2. Day Rate Pricing

Consultant day rates range from £500 to £1,200 depending on consultant expertise, seniority, and specialist skillset. All services are delivered remotely unless otherwise agreed.

Role / Consultant Type	Day Rate (GBP)
Microsoft 365 Consultant	£500–£800
Power Platform Developer	£500–£1000
SharePoint / SPFx Consultant	£700–£1000
Azure Developer / Engineer	£750–£1,200
AI / Copilot / Semantic Kernel Consultant	£750–£1,200
Solution Architect / Lead Consultant	£1,000–£1,200

3. Engagement Models

Delta Technology Services delivers consultancy through two primary engagement models:

- Time and Materials – Agile delivery charged per consultant day. Ideal for evolving, iterative projects.
- Fixed Scope / Fixed Price – A defined Statement of Work outlines scope, pricing, assumptions, risks, and acceptance criteria.

4. Additional Charges

- Travel and on-site work (if requested) are charged at cost and must be pre-approved.
- Licensing, software, and hosting fees are not included unless explicitly stated.
- Work outside UK business hours may incur enhanced rates.

5. Price Validity

All rates remain valid for the duration of the G-Cloud 15 framework unless adjusted during official refresh periods.

Discounts may be available for long-term engagements, multi-resource teams, or committed delivery schedules.
