

Power Platform Consultancy Services – Delta Technology Services

Service Overview

Delta Technology Services provides expert Power Platform consultancy that enables organisations to build robust low-code solutions with confidence. Our Microsoft-certified Power Platform Developers and Architects help simplify processes, automate workflows, and design scalable Dataverse architectures. We focus on building solutions that are maintainable, secure, and aligned with best-practice governance, ensuring long-term value rather than short-term fixes. Delta is particularly known for its strong understanding of enterprise governance, enabling organisations to adopt the Power Platform safely at scale.

Scope of Service

App architecture, automation consultancy, Dataverse modelling, ALM guidance, governance and CoE planning.

Roles & Responsibilities

Delta provides Power Platform specialists; customers provide SMEs and data owners.

Security and Compliance

Consultancy follows DLP governance, RBAC, secure connectors, and Microsoft compliance practices.

Onboarding & Offboarding

Environment readiness assessment. Offboarding includes documentation and capability uplift.
