

SharePoint Consultancy Services – Delta Technology Services

Service Overview

Delta Technology Services delivers premium SharePoint Online consultancy, helping organisations transform collaboration, knowledge management, and intranet experiences. Our consultants bring years of hands-on experience designing SharePoint architectures that are intuitive, scalable, and aligned with organisational goals. Whether modernising existing sites or building new digital workplaces, we combine strong technical expertise (SPFx, Microsoft 365 integrations) with business-focused thinking to deliver solutions that work for real users. Delta is recognised for producing clean, sustainable SharePoint architectures that empower organisations rather than constrain them.

Scope of Service

Information architecture, governance, SPFx advisory, metadata models, site strategy, Discovery/Spike analysis.

Roles & Responsibilities

Delta provides SharePoint architects; customers provide site owners and governance stakeholders.

Security and Compliance

Solutions apply Microsoft 365 security baselines, conditional access and least-privilege models.

Onboarding & Offboarding

Tenant assessment, structure review. Offboarding includes governance packs and training.
