FEATURES

- Experienced cloud transformation professionals supporting complex technology change programmes
- Cloud strategy, vision and roadmap development aligned to organisational objectives
- Cloud readiness and organisational maturity assessments
- Business case development and investment planning for cloud transformation initiatives
- Governance, assurance and control frameworks for cloud transformation programmes
- Supplier coordination and multi-vendor delivery management
- Legacy technology modernisation and cloud migration planning
- Transition planning, risk management and operational readiness activities
- Business change, stakeholder engagement and adoption support
- Delivery leadership throughout the cloud transformation lifecycle

BENEFITS

- Access to experienced cloud transformation leadership and delivery expertise
- Reduces delivery risk through structured planning, governance and oversight
- Improves organisational agility through modern technology and operating models
- Strengthens control and visibility across complex transformation programmes
- Enables smoother migration from legacy environments to modern cloud services
- Improves collaboration, productivity and digital service delivery
- Supports successful adoption of new technologies through effective change management
- Builds organisational capability to manage and evolve cloud-based services
- Provides a scalable foundation for future transformation and continual improvement
- Increases confidence in cloud transformation outcomes through disciplined delivery management

PLANNING

Confi helps organisations plan and govern cloud transformation initiatives, ensuring technology change is aligned to business objectives, operational needs and delivery priorities.

We work with clients to shape transformation strategies, business cases and roadmaps while assessing cloud readiness, organisational capability and the maturity of existing technology and service environments.

Planning activities focus on identifying risks, dependencies, governance requirements and delivery challenges early, enabling informed decision-making throughout the transformation lifecycle. We also support supplier engagement, transition planning, business readiness and operating model development to help organisations prepare for change.

Our planning approach provides a structured foundation for cloud transformation, ensuring programmes remain controlled, measurable and aligned to organisational objectives from initiation through to implementation and adoption.

MOBILISATION & ENGAGEMENT SETUP

Confi mobilises quickly into cloud transformation programmes, establishing the governance, stakeholder engagement and delivery controls required to support successful technology change.

Early engagement focuses on understanding organisational objectives, existing technology environments, transformation priorities and business requirements. This enables risks, dependencies and delivery challenges to be identified and managed from the outset.

Roles, responsibilities, reporting arrangements and decision-making structures are agreed during mobilisation, ensuring clear accountability and effective governance throughout the transformation lifecycle.

The mobilisation approach is designed to provide early visibility, maintain organisational alignment and establish a controlled foundation for successful cloud transformation delivery.

QUALITY ASSURANCE

Confi applies structured quality assurance throughout cloud transformation programmes to ensure delivery activities remain aligned to agreed objectives, governance requirements and success criteria.

Quality assurance activities focus on transformation readiness, delivery performance, risk management, stakeholder engagement and programme controls, helping organisations maintain confidence throughout the transformation lifecycle.

Regular reviews provide visibility of progress, dependencies, risks and organisational readiness, enabling timely intervention where corrective action is required.

Our objective is to ensure cloud transformation programmes remain controlled, measurable and focused on achieving successful business and operational outcomes.

TRAINING AND KNOWLEDGE TRANSFER

Confi works alongside client teams throughout cloud transformation programmes, helping organisations build the knowledge, skills and confidence needed to adopt and sustain new technologies, services and ways of working.

Knowledge transfer focuses on transformation governance, service management, operational readiness, stakeholder engagement and organisational change, ensuring teams are prepared to support and evolve the new environment successfully.

Where appropriate, Confi provides coaching, mentoring and practical guidance to delivery teams, service managers, operational leaders and key stakeholders, helping embed capability across the organisation.

Our objective is to leave behind stronger organisational capability, improved readiness and the confidence required to realise the long-term benefits of cloud transformation.

SUPPORT

Confi provides ongoing support throughout cloud transformation programmes to help organisations maintain delivery momentum, stakeholder confidence and operational readiness.

Support activities may include transformation oversight, supplier coordination, stakeholder engagement, governance participation, risk management and progress reporting, ensuring transformation activities remain aligned to organisational objectives and priorities.

Where required, Confi can provide additional support during key migration phases, transition activities or periods of increased delivery pressure, helping organisations manage complexity while maintaining continuity and control.

Support arrangements are tailored to organisational requirements, ensuring the appropriate level of leadership, governance and transformation support is available throughout the engagement.

SUPPORT SERVICE LEVELS

Telephone

M-F, 09:00 to 17:00

Excluding UK public holidays

Email

M-F, 09:00 to 17:00

Excluding UK public holidays

Response time: Within 4 hours

SECURITY AND VETTING

- Confi embeds a strong security culture across all engagements, supported by compliance with information security, data protection and client security requirements.
- Suitably cleared personnel can be provided where required, including consultants holding BPSS, SC and higher levels of clearance where available and appropriate to the engagement.
- Access to client information is restricted to authorised personnel with a legitimate business need, with appropriate controls applied to protect confidentiality, sensitive information and intellectual property throughout the engagement lifecycle.

ONBOARDING

Once an engagement is confirmed, Confi works with the nominated client contact to arrange a mobilisation meeting with the sponsor and key stakeholders.

During mobilisation, we confirm:

- The scope and objectives of the engagement
- Key activities, deliverables and expected outcomes
- Governance, stakeholder engagement and reporting arrangements
- Timescales, dependencies and client inputs required for success

Following mobilisation, Confi establishes the appropriate delivery structure and begins engagement activities, ensuring rapid integration with client teams while minimising disruption to ongoing operations.

OFFBOARDING

Offboarding is tailored to the scope, objectives and outcomes of each engagement.

Specific activities, deliverables and transition requirements are agreed as part of the engagement and documented where appropriate.

During offboarding, Confi will ensure:

- All agreed deliverables have been completed and formally handed over
- Knowledge, lessons learned and agreed recovery practices have been transferred to relevant client teams where required
- Any client information obtained during the engagement is securely retained, returned or destroyed in accordance with applicable contractual, security and data protection requirements

This approach provides a controlled transition, protects information security and supports the continued success of the delivery environment following completion of the engagement.

OUTCOMES & DELIVERABLES

The specific deliverables of this service are tailored to each engagement, reflecting the organisation's context, scale, priorities and desired outcomes.

The exact scope, activities and outputs are agreed and documented within the Statement of Work before delivery begins.

Typical outcomes include:

- Cloud transformation strategy and roadmap aligned to business objectives and delivery priorities
- Cloud readiness, capability and maturity assessments that inform planning and investment decisions
- Transformation plans supporting migration of services, applications and operational capabilities to the cloud
- Governance, risk and control frameworks that strengthen confidence throughout transformation delivery
- Improved organisational readiness, stakeholder engagement and technology adoption
- Governance and reporting that provide visibility of progress, risks, dependencies and outcomes

THE CONFI APPROACH

- Confi adopts a flexible engagement model to meet each client's needs, from long-term, multi-disciplinary delivery teams to short-term, rapid-response assignments.
- We work in partnership with our clients as a trusted delivery advisor, focused on meaningful change, improved performance and ensuring investments deliver clear value for money. Our delivery style is calm, structured and outcome-driven, with strong governance and clear communication at every stage.
- Our work is guided by Confi's core values: Clarity, Integrity, Control and Excellence, ensuring every engagement is transparent, disciplined and focused on results.

CLIENT RESPONSIBILITIES

For each engagement, Confi will identify any client dependencies and confirm them during mobilisation to support effective delivery and decision-making.

Typical client responsibilities include:

- Providing timely access to relevant stakeholders, sponsors and decision-makers
- Supplying accurate information on delivery performance, governance, risks, plans and context
- Supporting agreed governance, reporting and stakeholder engagement activities throughout the engagement
- Providing timely review, feedback and approval of key outputs and recommendations

Defining responsibilities early helps establish clear ownership, reduce delivery risk and support successful transformation outcomes.

ABOUT CONFI

Confi Consultancy is a specialist delivery consultancy supporting organisations through complex programmes, transformation initiatives and operational change.

We provide experienced delivery leadership, governance, assurance and recovery capability across public sector, defence and commercial environments, helping organisations strengthen control, improve delivery confidence and achieve successful outcomes.

Our approach combines practical experience, structured governance and clear accountability, ensuring engagements remain focused on delivery performance, risk reduction and measurable results.
