Kortext stream pricing

The Kortext stream pricing model has been designed for simplicity and transparency. Kortext stream is offered as an annual subscription, with all standard development and upgrade activities included in the annual fee detailed below plus a technical enablement and onboarding fee. Optional services, such as bespoke development or additional integrations, are priced separately.

All pricing is based on a three-year agreement, excluding VAT, an annual RPI increase will be applied of up to 3%.

Annual subscription licence costs

The table below shows the annual subscription costs based on the total number of students (HESA).

Description	Description	Annual List Price
Kortext stream enterprise 0–10,000 students	University-wide licence	£120,000
Kortext stream enterprise 10,001–20,000 students	University-wide licence	£141,000
Kortext stream enterprise 20,001+ students	University-wide licence	£156,000

Annual cloud hosting

The summary below is in addition to the subscription licence:

Description	Description	Annual List Price
Kortext stream enterprise 0–10,000 students	Kortext cloud hosting	£24,000
Kortext stream enterprise 10,001–20,000 students	Kortext cloud hosting	£30,000
Kortext stream enterprise 20,001+ students	Kortext cloud hosting	£36,000

*List price includes staging and production environments

Technical enablement and onboarding

The summary below is required for technical enablement and onboarding for stream.

Description	Description	List Price
Implementation Technical enablement	A stream implementation comprises two complementary strands: technical enablement and business enablement. During the technical enablement, Kortext works closely with the university to deploy Kortext stream as the foundational data layer. Kortext stream securely ingests, normalises, and connects data from multiple institutional systems, creating a single trusted source of student activity data. Our project team, led by a Project Manager, partners with your team through key stages, including solution design, data validation, system connectivity, and custom configuration. Our project team, led by a Kortext Project Manager, partners with your team through key stages, including solution design, data validation, system connectivity, and custom configuration. Kortext Technical Leads provide expert guidance to streamline the implementation, and Solution Consultants deliver targeted training and familiarisation to support adoption and confidence in the platform. Key systems integrated via Kortext stream include: 1. Student Information System (mandatory) 2. Virtual Learning Environment (mandatory) 3. Additional educationally purposeful activity system 4. Additional educationally purposeful activity system 5. Additional educationally purposeful activity system By leveraging this process, it establishes a single source of truth for your data. The university can then connect learning, engagement, and wellbeing data across systems, feeding into both custom and other additional products. Combined with the underlying data management technology this will enable robust analytics, targeted interventions, and strategic insight into retention, progression, international student success, and wellbeing outcomes.	£30,000
Implementation Business Process Consultancy	Kortext stream Implementation – Business Process Consultancy	£19,000

	Our Business Process Consultancy supports the sustainable adoption of Kortext stream across the university. Through this approach, we work collaboratively to design and implement a tailored adoption plan, encompassing cultural, process, and structural considerations. Activities typically include: • Discovery workshops to understand university requirements • Business process design aligned to student support and PAT workflows • Training sessions and solution familiarisation for staff • Development of operational workflows, governance, and ongoing support structures This combination of activities empowers staff to use Kortext stream effectively, accelerates adoption, and ensures long-term impact. A bespoke Business Enablement package (typically 20 days) is designed following the initial discovery phase to meet the specific needs of your university.	
Kortext Implementation	Combined TOTAL	£49,000

Ad hoc Professional Services

The summary below is for optional professional services to be used in support for customer change requests or additional future projects.

Description	Description	List Price
Ad hoc Professional Services	Blended day rate	£1200
