1. Overview

Provision of specialist design, delivery and assurance advisory to public sector organisations delivering cloud-enabled programmes and services including training, programme management, risk management, specialist assurance and thematic intelligence with a focus on UK and international security capability and capacity programmes.

2. Service Features

2.1 Core Services

Services are internationally deployable

- **Project management** - including infrastructure, technology, training, capability and capacity programmes. Additionally offering service integration across multiple suppliers to minimise client effort and maximise outcome realisation.
- **Monitoring Evaluation, Research and Learning** - (MERL / MEL) maximising opportunities and measuring outcomes.
- **Thematic Advisory and Assurance** - strategic and operational development of people, products and services thematically aligned to desired outcomes in specialist areas e.g. Counter Terrorism (CT), Serious Organised Crime (SOC), Violence Against Women and Girls (VAWG), Border Security, OSINT, Immigration, Safeguarding, Maritime Security, Data Analytics and AI.
- **Commercial Advisory and Assurance** - supporting pre and post procurement including strategy, procurement, compliance and governance, cost modelling, benefits realisation, risk management, health checks and contract management.
- **Training** - Design and delivery of in person and remote training, workshops, coaching and mentoring.
- **Risk Management** – standard programme risk mitigation including threats to people, products and services through Open Source Intelligence (OSINT).
- **Security & Logistics** - Supporting safe delivery through Crisis Management Planning and in-country security.

2.2 Support

Support levels can be flexed depending on the advisory services engaged and range from immediate in person to remote (online, email, phone) during UK office hours.

2.3 Security

Appropriate required levels of security clearance will be met up to DV. Personnel security controls and screening are applied proportionately based on the nature of the service called off.

All work is conducted in accordance with UK GDPR and relevant legislation. CIS are experienced in handling sensitive and restricted information. Advisory activities are delivered in accordance with client security policies and data handling requirements.

3.0 Other Information

3.1 Pricing

Depending on buyer requirements, scope and deliverables CIS can provide services as:

- Fixed Price
- Time and Materials
- Retained Advisory

Discounted pricing may be offered to educational organisations subject to scope, duration and budget, agreed on a case-by-case basis.
