Enterprise Pricing Overview

The Hygraph Enterprise Pricing consists of **a Project fee** and **a Platform fee**.

A customer can have one or more Projects.

Projects reflect different requirements of a specific initiative e.g. number of content models, traffic, number of content records.

Platforms reflect organizational needs around security, availability and compliance.

Project

Consumption, Content Architecture and Federation, Publishing and Development Workflows

Prices: 12,000 to 96,000 GBP per project depending on user numbers and project size

Platform

Organizational Governance, Security and Compliance, Performance, Support and Services

Prices: 14,000 to 40,000 GBP depending on infrastructure size, SLAs, traffic and support levels.
