

Pricing – Alfa Medication Logistics

Software subscription services through the G-Cloud 15 framework.

This document provides a summary of the price model and pricing terms for the Alfa Medication Logistics Services along with some pricing examples based on the UK specific Price List for 2026.

How Pricing Works

- The Alfa Medication Logistics solution and associated interfaces are offered as subscription services.
- A single subscription applies only to sites operated by a single subscriber (e.g a NHS Trust) as a statutory legal entity. Affiliates, including linked charities and non-statutory bodies must be handled as separate subscriptions.
- Any pre-existing site-specific service levels, local agreements, or requirements that are not expressly included in the standard subscription terms shall be out of scope and subject to separate agreement and additional charges.
- Each subscriber shall pay a baseline annual subscription fee covering the sites operated by that subscriber. Additional fees are charged per “volume bucket” of 300 beds (or 25 clinical areas) across all customer sites.
- The number of end-users does not affect the subscription fees.
- For Alfa Medication Logistics, the baseline and per-bucket fees are higher than for Alfa CD as the Alfa Medication Logistics can manage all medicines and commodities apart from the controlled substances covered by Alfa CD.

Annual Subscription Examples – Full Alfa Medication Logistics

- 300 beds: £193,500
- 800 beds: £219,500
- 1500 beds: £245,500

These annual subscription totals include:

- Baseline fee
- Volume-based fee

Notes

- Prices are exclusive of VAT and any purchasing framework markups.
- If the number of beds and the of clinical areas result in a different bucket count, then the higher bucket count number is used.
- Setup and training are mandatory additional services and are charged separately.

Key Pricing Terms

- Fees are updated annually in line with the UK Consumer Price Index (CPI).
- Fees may be updated if new optional features or new modules or interfaces are added.
- Invoices are issued annually during January and are payable within 30 days.
- All licence and maintenance fees are non-refundable once paid.
