BLUEFUSION Base Platform - Annual Contract

On-Premises physical hardware, single tenant installation of our unique unified OSINT and AdTech platform, delivered on our own accredited site as a dedicated single tenant standalone system for customers own exclusive use for up to 50 analysts, with provision for licence uplift if required.

Description	Quantity	Unit Price	VAT	Amount GBP
BLUEFUSION Infrastructure. On-Premises physical hardware installation on our own accredited site as a dedicated single tenant standalone system, equipment list can be provided. Can be swapped with Cloud Deployment option, depending on client preference, one off CAPEX at fixed storage capacity. Additional storage on demand.	1.00	3,750,000.00	20%	3,750,000.00
Platform Enterprise Licence - BLUEFUSION Enterprise Server. Enterprise service licence for base operating system, up to 50 user provision plus direct secure connectivity to BLUEFUSION dedicated infrastructure. Annual Licence, per deployed system.	1.00	1,000,000.00	20%	1,000,000.00
Software User Licence - BLUEFUSION.	1.00	373,000.00	20%	373,000.00

Cost is per User, per year, multiply up to a maximum of 50 as required, 10 user Minimum licence.

Unified global AdTech/SDK/ADSB/Live AIS/OSINT/SOCMINT/CTI/Deep/Dark web/Breach/Infostealer, CDR/GSM Data fusion, and visualisation for 200+ countries, GSM locate in over 80 countries. Access to full, proprietary, lawfully collected, unique datasets including AI enabled device entity resolution, location, targeting and real world correlation of SOI activity with no interception or TEI requirement.

BLUEFUSION unlimited access, unlimited queries and fixed cost for the duration of the project.

Unmatched enrichment alongside unparalleled insights for SOI geolocation and Pattern of Life, OSINT Deep, Dark,

Description	Quantity	Unit Price	VAT	Amount GBP
Breach and PII data, also data from non-traditional news feeds e.g. telegram, hacking forums, social media platforms, Truth Social, Mastodon, X / Twitter, Facebook, Telegram, TikTok, Instagram, YouTube, Reddit, News and media, VK, Threads, MAX, Odnoklassniki, Bluesky, Discord, Dark web and adversary channels, WhatsApp, LinkedIn, Snapchat + up to 3 emerging platforms on request per year as standard. Uncover intelligence or gain an atmospheric snapshot of trending topics gathering attention worldwide and the associated sentiment in response. The coverage is broad and dynamic and the collection is continuous with new categories and sources being added regularly. There is no other system that provides this level of data integration on the market today. GSM locate starter credits included with 20 per Analyst. Licences are fixed annual cost, no geographical restrictions on data use, no query limits or result returns as long as data is present in the system which in this configuration with supporting technologies outlined below.				
Software Licence - Image Analysis and Geolocation. A unique and highly specialised set of tools that enables geolocation of SOI within imagery sourced from any means, for instance social media or digital forensics from the platforms above. This is unique in that it achieves this without requiring EXIF or MetaData present. Key licence categories included are capabilities that allow the Authority analysts to geolocate from within imagery with confidence scoring. Also, granular street specific targeting for low context images to provide metre level precision, in addition to vehicle identification tools from imagery without the usual indicators available such as make/model and AI/Deepfake specific recognition tools.	1.00	200,000.00	20%	200,000.00
Cost is per User, per year, multiply up to a maximum of 50 as required:				
Software Licence - Platinum Reactor. Reactor Platinum is the most advanced SaaS Blockchain investigation platform for public sector and law enforcement organisations.	1.00	45,000.00	20%	45,000.00
It provides full blockchain tracing, entity attribution, network graph visualisation, automated demixing, and cross-chain fund flow analysis across all supported blockchains. Platinum includes Enhanced Observations (geo-location), an exclusive capability that links cryptocurrency wallet addresses (across chains) with geolocation information. Cost is per User, per year, multiply up to a maximum of 50 as required:				
Software Licence - OIS Non-Attribution. Secure Portal via which OSINT Analysts access the Internet completely securely, with zero attribution and including all commonly known free OSINT toolkits, end point deniability and relocation alongside browser spoofing for direct operational interaction outside of the BLUEFUSION collection platform and a new machine every 24hrs.	1.00	150,000.00	20%	150,000.00
Cost is per User, per year, multiply up to a maximum of 50 as required:				

Description	Quantity	Unit Price	VAT	Amount GBP
Software Licence - AGILE OSINT eSIM. Provision of bundled e-SIM's, issued within 24 hours of a request in blocks of 30 at a time, valid across all European countries, with MSISDN and SMS capability (no voice) 1GB monthly data as a complete managed service, for OSINT persona support, Social Media MSISDN registration and email SMS verification for OSINT analyst support. Additional coverage areas available on request. Assuming 30 per month, over 12 months for the purpose of financial budgeting.	1.00	36,000.00	20%	36,000.00
			Subtotal	5,554,000.00
			TOTAL VAT 20%	1,110,800.00
			TOTAL GBP	6,664,800.00

Terms

Pricing is valid until 31 Dec 2027 and the software can be augmented by a range of licence uplifts outlined in the BLUEFUSION Options pricing document.

Invoices are issued in advance and each annual licence cohort and any applicable service fees are payable prior to delivery.

Delivery also subject to EULA completion where applicable.

BLUEFUSION Licence Uplift, Optional SaaS Extras - Annual Contract

BLUEFUSION optional SaaS Licence uplifts to augment the base capability where a more bespoke and enhanced capability is required, to include Cloud deployment and novel data feeds.

Can be ordered as individual line items.

Description	Quantity	Unit Price	VAT	Amount GBP
Cloud Deployment - BLUEFUSION.	1.00	1,500,000.00	20%	1,500,000.00
BLUEFUSION cloud deployment on accredited provider infrastructure plus spare capacity as required up to maximum of 50 users with 24 month Data retention and catalogue. Storage can be upgraded on demand to increase historical data access. Annual cost, excludes cloud hosting fees from clients chosen provider.				
Data Provision - EO ISR EMS Satellite Tasking	1.00	4,940,000.00	20%	4,940,000.00
Licence uplift augmenting BLUEFUSION device location, when there is no electronic profile or data available for a vessel of interest. This licence provides on demand delivery of imagery and supporting data for Dark vessels, spoofing, bunkering, cooperating etc with Global Coverage and a single sensor provides over 500,000km square area of interest. A total of 36 EMS Taskings, 20 SAR Taskings and 40 EO Taskings as well as access to up to 80 EO archive images available monthly. Minimum 12 month contract required, Licence cost is per service, annually renewable.				
Data Provision - BLUEFISH Satellite Passive collection	1.00	1,750,000.00	20%	1,750,000.00
Licence uplift augmenting BLUEFUSION device location, when there is no GSM or Satellite Internet active on vessels or other platforms, provision of a physical sensor, passively collecting downlink data to locate Satellite				

Description	Quantity	Unit Price	VAT	Amount GBP
network modems in use by SOI within 1500km from the centre of the sensor location, billed monthly whilst in use. One off Setup Fee and Hardware Capex included, 12 months passive collection on Thuraya, Iridium, Inmarsat and Thuraya, min 3 year contract - annual licence cost illustrated here.				
Software Licence - BLUENEXUS Field Tool	1.00	120,000.00	20%	120,000.00
One tool - any digital forensics extraction, reducing existing DFIR licence fees significantly. NEXUS is an AI powered offline field tool that allows automated analysis and categorisation from devices seized and examined using any existing digital forensic tools on the shoreline, border or port of entry, allowing analysis of digital extractions to be automated and key selectors to be extracted, networks and contacts identified and all content automatically translated with no analyst input required and fed into BLUEFUSION for real world geolocation. Price includes hardware and 12 month licence.				
Software Licence - BLUENEXUS Lake	1.00	1,750,000.00	20%	1,750,000.00
Consolidation of field tool extractions for use across entire Analytical team nationally as well as input data from BLUENEXUS field tools in order to provide fast and actionable intelligence from seized device data regardless of point of origin or type, automating the analysis of data across the entire team and instantly translated content for BLUEFUSION ingestion.				
Annual licence cost illustrated here assuming it is to be hosted on existing BLUEFUSION infrastructure, which may incur additional costs depending on the specification.				
Service Provision - AGILE Operator SIM	1.00	65,000.00	20%	65,000.00
Agile SIM - data SIM with IMSI rolling - designed for use by Operators as issued SIM for OTA comms and WiFi hotspot for secure Internet access as well as persona data bearer where used as part of OSINT operations and travelling.				
Bundles of 50 SIMs with 500mb each Data allowance with dynamic allocation of data where other SIMs may use more than others, requiring zero management. Annual cost illustrated.				
Data Provision - SOCMINT API Call	1.00	120,000.00	20%	120,000.00
Licence uplift augmenting BLUEFUSION, ability to enrich SOI target packs with updated SOCMINT directly in the system without requiring a separate OSINT or SOCMINT licence as required, per query bundled cost, annual capped query cost				
Service Provision - Telegram ID	1.00	330,000.00	20%	330,000.00
Per query bundled credit cost brackets providing the MSISDN behind a public facing Telegram Handle, 10k queries per year minimum licence.				
Data Provision - GSM locate credit	1.00	225,000.00	20%	225,000.00
Licence uplift augmenting BLUEFUSION GSM MSISDN Location credit back lookups in over 100 countries that do				

Description	Quantity	Unit Price	VAT	Amount GBP
not require TEI or Interception, allowing almost real time Geolocation of MSISDNs if on coverage and switched on. No data returned, no credit is used.				
Bundle of 1000 per year to start with, can be topped up as required.				
Software Licence - ODIN Device Emulator	1.00	130,000.00	20%	130,000.00
Analyst tool designed to provide emulation via a specially configured software on Android that allows the user to emulate a WhatsApp or Signal profile in order to use social engineering and access the forums behind encryption including usernames, phone numbers, where available, timestamps, text, images, videos, shared files, links and message events.				
Annual Licence cost for up to 30 users				
Service Provision - OXIDE - Online Personas - In Theatre/Overseas	1.00	250,000.00	20%	250,000.00
Persona, plus physical device in theatre, communications bearers, financial facilities, presence on all major and relevant platforms, includes all covert infrastructure and associated devices - all non-attributable. Price per persona complete as an annually licensed service.				
Data Provision - Real Time Bidding.	1.00	0.00		0.00
Service to provide near real time ADID geolocation and intelligence based on Real Time Bidding campaign, configured to a specific geographic area, time, duration specific to task as a tailored project.				
			Subtotal	11,180,000.00
			TOTAL VAT 20%	2,236,000.00
			TOTAL GBP	13,416,000.00
