Trusted by Global Brands

"EHSSwize provides us with a centralised portal to manage our Accident/Incident Reporting, Site Audits, Safety Observation Reports and Asset Management.

Throughout the entire process the EHSSwize team have gone above and beyond to tailor the platform to our specific needs and make the transition as seamless as possible for our end users."

Denis O'Sullivan

Associate Director,
EHS & S

Data security and compliance with the GDPR

The Kianda EHSwise platform is hosted in Microsoft Azure Global Cloud within secure datacentres

As a customer, you maintain ownership of your data – the content, personal and other data you provide for storing and hosting in Azure services. You are also in control of any additional geographies where you decide to deploy your solutions or replicate your data.

- All data is encrypted at rest and in transit using enterprise grade encryption
- Kianda strictly maintains data residency to comply with GDPR rules and other data sovereignty rules
- Kianda staff has no access to our customers' data unless requested by the customer for support purposes

Security: Kianda EHSSwice is ISO 27001 ISMS Certified

ISO 27001 is the highest standard in information security management

- The underlying Kianda Lowcode Software platform is ISO27001:2022 ISMS certified
- Stringent HR policies and practices are implemented across the company to ensure staff adheres to security practices
- The company is externally audited by Amtivo UK on an annual basis.
- Kianda Technologies staff must complete security training on a regular basis

ISO/IEC
27001: 2022
Certified
