# Tanium Solutions and Bundles for Cloud

16 January 2026

# Table of Contents

# Tanium Solutions & Bundles (as of November 2025)

User guides to the components that comprise the latest Tanium Solutions & Bundles

Tanium Solutions

## Core Plus

- Tanium Core
- Tanium Discover
- Tanium Benchmark
- Tanium Automate
- Tanium Integrations Gallery
- Tanium Certificate Manager
- Tanium Engage
- Tanium Jump Gate

## Endpoint Management Plus

- Tanium Provision
- Tanium Patch
- Tanium Deploy
- Tanium Performance
- Tanium Enforce
- Tanium Investigate
- Tanium Connector for Microsoft Intune

## Risk & Compliance Plus

- Tanium Comply
- Tanium SBOM
- Tanium Integrity Monitor
- Tanium Reveal

## Incident Response

- Tanium Threat Response
- Tanium Impact

## Endpoint Management for Mobile

- Tanium Endpoint Management for Mobile

# Endpoint Management for Operational Technology

Tanium Core for Operational Technology
Tanium Exposure Management for Operational Technology

Tanium Bundles

Product Descriptions

Product descriptions of the latest Tanium Solutions & Bundles

| Product Name | Product Description |
|---|---|
| Tanium Core Plus - Tanium Cloud | Provides organizations with patented real-time data and autonomous IT capabilities to manage IT and security risks. It provides operators with comprehensive visibility of their endpoint estate and a trusted single source of truth. Autonomous functionality within Core enables operators to automate actions and remediations, provides the ability to manage risk, track user sentiment, integrate real-time data into decision making and integrate into third-party solutions. |
| Tanium Endpoint Management Plus - Tanium Cloud | Designed to provide cross platform lifecycle management from a single console by providing visibility and control over endpoint assets whether on premises or in the cloud. The solution begins with provisioning new endpoints and continues through the lifecycle of patch management and third-party software deployments, policy enforcement performance monitoring and issue investigation to give administrators the ability to see, control and remediate in real time. The combination of Endpoint Management and Tanium Core enables IT to deliver improved digital work experiences (DEX) using a bi-directional feedback loop to measure employee sentiment and satisfaction over time. |
| Tanium Risk & Compliance Plus - Tanium Cloud | Offers a comprehensive overview of your organization's |

| Product Name | Product Description |
| --- | --- |
| | risk status across all endpoints. The solution allows CISOs and their teams to effectively manage risk at scale from large global environments to regional entities. Tanium collects real-time risk data, including vulnerabilities, compliance configuration risks, and sensitive data findings, from millions of assets and unifies risk assessment and remediation in a single platform plus the ability to build a comprehensive Software Bill of Materials (SBOM) at runtime. |
| Tanium Incident Response - Tanium Cloud | Provides organizations the ability to take them from the moment of incident detection to complete remediation all within a single integrated tool. This solution accelerates your existing EDR and SIEM and closes the loop on security incidents. |
| Tanium Core Plus - Tanium Cloud for US Government | Provides organizations with patented real-time data and autonomous IT capabilities to manage IT and security risks. It provides operators with comprehensive visibility of their endpoint estate and a trusted single source of truth. Autonomous functionality within Core enables operators to automate actions and remediations, provides the ability to manage risk, track user sentiment, integrate real-time data into decision making and integrate into third-party solutions. |

| Tanium Incident Response - Tanium Cloud for US Government | Provides organizations the ability to take them from the moment of incident detection to complete remediation all within a single integrated tool. This solution accelerates your existing EDR and SIEM and closes the loop on security incidents. |
| Tanium Core Standard - Tanium Cloud | Provides organizations with patented real-time data and autonomous IT capabilities to manage IT and security risks. It provides operators with comprehensive visibility of their endpoint estate and a trusted single source of truth. Autonomous functionality within Core enables operators to automate actions and remediations, integrate real-time data into decision making and integrate into third-party solutions. |
| Tanium Endpoint Management Standard - Tanium Cloud | Designed to provide cross platform lifecycle management from a single console by providing visibility and control over endpoint assets whether on premises or in the cloud. The solution manages the lifecycle of patch management and third-party software deployments, combined with performance monitoring to give administrators the ability to see, control and remediate in real time. |
| Tanium Risk & Compliance Standard - Tanium Cloud | Offers a comprehensive overview of your organization's risk status across all connected endpoints. This solution allows CISOs and their teams to effectively manage risk at scale from large global environments to regional entities. Tanium provides visibility into real-time risk data, including vulnerabilities from millions of assets, and unifies risk assessment and remediation in a single platform. Additionally, this solution includes the ability to build a comprehensive Software Bill of Materials (SBOM) at runtime. |
| Tanium Endpoint Management for Mobile | Provides visibility and control across iOS and iPadOS to close gaps, enforce policies, and reduce risk. Integrates traditional Mobile Device Management (MDM) and IT Operations workflows into a single platform, combining real-time intelligence, AI, and automation to reduce manual effort and deliver consistent control across endpoints. Licensed by Device. |
| Tanium Core for Operational Technology | Delivers real-time, comprehensive visibility across OT |

| Product Name | Product Description |
| --- | --- |
| | environments. Enables exposure and asset inventory management without added infrastructure. Licensed by OT Satellite. The number of OT Devices monitored by each OT Satellite may not exceed 250 OT Devices. |
| Tanium Exposure Management for Operational Technology | Provides real-time risk assessment of OT environments for security configuration exposures and software vulnerabilities. Requires an equivalent number of licenses for Tanium Core for Operational Technology. Licensed by OT Satellite. The number of OT Devices monitored by each OT Satellite may not exceed 250 OT Devices. |
