

Cyber Strategy Services

A robust Cyber Strategy is vital for UK public services providers. It protects critical information, ensures continuous service availability, and safeguards public trust from cyber threats. We help define objectives, ensure compliance (CAF/ NIS2, Data Protection Act), and develop actionable plans for enhanced cyber resilience. The aim is to draw a clear line between your consumers, organisational objectives and cyber security initiatives, so that everyone is clear why you need an effective resilience programme, and what their responsibilities are within it.

Our Approach

1. Request for Information

Gather initial data to understand your organisation's current posture and wider digital transformation plans.

2. Assessment

Detailed analysis of systems, policies, and vulnerabilities to identify and prioritise objectives and actions.

3. Stakeholder Workshops

Facilitate collaborative sessions to gather insights and align organisational, digital, and cyber objectives.

4. Development & Presentation

Develop, refine, and deliver a comprehensive Cyber Strategy and implementation roadmap.

What We Need From You

- Access to key stakeholders for interviews and workshops (e.g., IT leadership, business unit heads, legal/compliance officers).
- Relevant documentation, including existing cyber security policies, IT architecture diagrams, risk assessments, and compliance reports.
- Information on current and planned digital transformation initiatives.
- Details on your organisation's business objectives and critical services.
- Availability for scheduled meetings and feedback sessions throughout the strategy development process.

Service Objectives

- Create a board-approved, adopted strategy with resource estimates to focus resilience efforts.
- Prove the benefits of improving cyber security and enable a healthy cyber secure culture.
- Increase efficiency and effectiveness of security investments and digital transformation success.

Service Options

Foundation: £5,000 ex VAT

For smaller organisations (e.g., local councils, NHS providers) starting their resilience journey.

Enhanced: £25,000 ex VAT

For larger councils, NHS Trusts, and Essential Service Operators, staying ahead of dynamic threats.

Complex: £50,000 ex VAT

For large organisations (e.g., Central Gov, ALB) or those undergoing significant changes like mergers.

Key Features

- Defined, measurable strategic objectives mapped to national strategies and transformation agenda.
- Aligned to UK data protection, cyber security and resilience act, and NCSC Cyber Assessment Framework (CAF).
- Clear strategy-to-delivery roadmap and action plan with resource estimates.
- Experienced specialists with strategic and operational expertise in public sector cyber.
- Focused on whole organisation and adoption of a true cyber secure culture.

Benefits to your organisation

Risk Reducing

Clear strategy to target greatest risks and harms to reduce impact and likelihood of attacks.

Cash Releasing

No wasted investment, focused activity ensures optimal use of resources and automated processes.

AI Enabling

Cyber strategy leads to a better view of assets and access rights, allowing faster, trusted AI adoption.

About us

- SME with highly experienced subject matter experts.
- Security clearance to BPSS, NPPV3 and SC.
- Specialists in delivery of end-to-end resilience.
- Wide-scale cyber programmes for UK Government.
- Public Sector first and mission-driven.
