

Cloud Migration Service & Identity, Device, Application and Data Modernisation

Cloud migration service aligning with NCSC and CIS standards for Windows 11, featuring Entra for identity, Intune for device management, Robopack for app packaging, and SharePoint with Purview for secure data governance. Delivers a compliant, secure, and modern cloud environment with centralized management of users, devices, apps, and data.

Our Approach

1. Discovery

Gather initial data to understand your organisation's security health and asset volumes for identity, devices, applications and data.

2. Design & Pilot

Design with security and privacy principles aligned with NCSC and CIS standards. Pilot key persona and users groups.

3. Migration and Consolidation

Create migration plans and extend pilot groups in agreed tranches with support for in house teams and users.

4. Sustained Support

Provide post migration support for in house teams, create documentation suite and knowledge transfer and proof of value report (before and after risk profile).

What We Need From You

- Access to key stakeholders for interviews and workshops (e.g., IT leadership, business unit heads, legal/compliance officers).
- Relevant documentation, including existing cyber security policies, IT architecture diagrams, risk assessments, and compliance reports.
- Information on current and planned digital transformation initiatives.
- Details on your organisation's business objectives and critical services.

Service Objectives

- Transform user experience with secure and seamless access to data and applications.
- Remove legacy technical debts and poor practice built up over 25 years using on prem solutions.
- Reduce risks of cyber security incident and data loss making services more resilient.
- Save time and money in management and maintenance of legacy on premise infrastructure.

Service Options

Discovery: £25k to 50k ex VAT

Security Review of AD and Entra, discovery through existing systems (e.g. MECM) and proprietary tools and scripts.

Design-Pilot: £30k to 100k ex VAT

HLD and LLD created for chosen components with solution pilot for small group of identities / users.

Migration: From £60 user ex VAT

Includes our migration tools (Quest), App packaging (Robopack) and services. Excludes O365 licensing.

Sustained Support: £50k+ p/a

Bespoke designs needed to meet specific requirement

Key Features

- Detailed report showing risks and metrics needed ahead of migration.
- Design and planning incorporate best practice and security by design principles.
- Complete service across critical elements of zero trust architecture adoption using O365 and modern, cloud native security.
- Services can be delivered in modules to work at your pace or as full programmes to transform end user experience and security posture
- Ongoing support from specialists to assure configuration in optimised, emerging threats are considered and new features incorporated.

Benefits to your organisation

Risk Reducing

Clear strategy to target greatest risks and harms to reduce impact and likelihood of attacks.

Cash Releasing

No wasted investment, focused activity ensures optimal use of resources and automated processes.

AI Enabling

Cyber strategy leads to a better view of assets and access rights, allowing faster, trusted AI adoption.

- SME with highly experienced subject matter experts.
- Security clearance to BPSS, NPPV3 and SC.
- Specialists in delivery of end-to-end resilience.
- Wide-scale cyber programmes for UK Government.
- Public Sector first and mission-driven.
