

G-CLOUD 15 PRICING

Total asset control at
your fingertips

When you run a fleet it's not easy to be everywhere, all the time. Yet with the demands of operating a compliant, well-maintained fleet, you need to perform this feat. That's where r2c come in.

Driver checks will upload instantly wherever they take place. Every completed service and maintenance sign-off appears in front of you. The health and compliance of your fleet is laid out on screen, in real time.

It means that you can be in one place and yet in complete control of your vehicles throughout the country. Reassuring. Compliant. Accurate. Confident. Through innovative digitisation, r2c will transform how you run your fleet.

CORE

PUTTING YOU AT THE HEART OF YOUR FLEET OPERATION

With Core, you can pull in service documents, histories and transactions from every workshop, depot or dealer. No chasing of paper records, trying to match multiple copies or only finding out about work or spend after the event.

Completely digitised and operating in real time, you get the definitive version of everything that is going on, at your fingertips.

Automatic reminders and maintenance scheduling help you line up workflow. Safety and compliance breaches alert you to issues before they become problems. Intervention ahead of time rather than alarm as it happens. All in real time, controlled by you from connected, seamless dashboards.

AT THE DIGITAL CORE OF YOUR FLEET

- **Service history**
- **Defect management**
- **Asset management**
- **Job tracking**
- **Maintenance planning**
- **Reporting**
- **Jobsheets**

DRIVER PRE USE CHECKS APP

COMPLIANCE CHECKS
MADE
EASY &
ENJOYABLE

One team driving compliance: you and your drivers.

A fully compliant fleet requires teamwork. With Driver, users complete daily checks on a mobile device, and instantly, you receive the report. That way, nothing is missed, everything is gained.

Compliant with DVSA, Health & Safety, Loler, Puwer and ADR regulations, you can be confident in your fleet's safety at all times.

Clarity is everything. You can see any problems or issues using photos and attached notes describing the problem, sent from your drivers. No confusion, just solutions.

Easily manage defects from creation through to completion in the workshop with real-time alerts and access a full driver check report to find all the information you need.

“

With r2c, our defects are reported live through our system and we're notified if they aren't completed in time.

”

Ultimately it's reduced our vehicle downtime - we've saved over £20,000 a year in the last five years.

Allan Morris

DIGITAL DRIVER MANAGEMENT

- A full driver's check report at your fingertips
- Visual annotation for total transparency
- Digital sign-off
- Real-time defect alerts
- 100% DVSA compliant

VANTAGE POINT

DATA REPORTS, COMPLIANCE & KPI DASHBOARDS

Helping you achieve Earned Recognition.

Designed with Earned Recognition in mind, Exemplar's compliance dashboard lets you measure progress against KPIs, while an 'early warning' trigger system helps you avoid future mishaps. You can even import tachograph data too.

Intelligence and insight is everything.

Your fleet creates a lot of data, but you need to turn all those numbers into knowledge. What's working. Where problems are occurring. How issues are best solved. Why vehicles perform the way they do.

With Vantage Point's powerful business intelligence tool, you can draw all the data together to create sophisticated and tailored reports and insights that demonstrate what is happening on the road, in the cab and on the workshop floor.

The fleet health check tool provides a snapshot of your fleet in real time, showing compliance and performance. And you can see problems coming too, with the early warning system. It highlights gaps in your records or missing data, so you can sort them before it becomes an issue.

SEE IT ALL WITH VANTAGE POINT

- Performance analysis
- Compliance analysis
- KPIs
- Fleet health check
- VOR analysis
- Tailored reporting

INSPECT

TOUCH SCREEN DATA CAPTURE

A few clicks are all it takes.

Maintenance management in just a few clicks. You can instantly call up all documents, records and transactions for every job, vehicle, workshop or technician, so there's a full audit trail of everything, at your fingertips.

And for technicians, they can access every detail of work, letting them get on with the job rather than spend time working out what needs to be done.

Dashboards keep you up to date with every part of your workshop. From flagging up events that need looking at, to presenting costs, planning, timing and scheduling, a few clicks will bring your whole operation to your tablet, laptop or desktop.

“

Removing paper admin saved us 10% of our overall time in the workshop – which is over 50 hours a week. Technicians are a valuable resource and their time is paramount – r2c is the best system I've used.

”

PRODUCTIVITY

Make Work Flow.

With every job and every bay booked online, you can process requests, shift jobs around and schedule planned, and unplanned work. We'll even send automatic reminders to everyone involved.

That way, work flows. Vehicles turn up on time. Parts arrive when they're needed. The right technicians are in the right place at the right time, and you can manage capacity across your business.

Real time reporting means real time management. Smart T-cards mean your team are able to manage their workload and update you and your customers with live status reports.

WORK SMART

- Capacity dashboard
- Drag & drop T-card management
- Work prioritisation

“

All together r2c has helped take us to a higher level, making us much more appealing for larger customers, for whom we now have the technology that enables us to produce the results they expect. We are fully equipped for the 'big boys' now.

”

Jill Flockhart

Managing Director

Phoenix Van, Truck & Trailer Limited

STOCK MANAGEMENT

Take stock and streamline supply.

Having the right parts at the right time is everything. It's literally the nuts and bolts of your operation. Our dashboards show you instant stock levels, with automatic alerts when you get low.

With our new improved smart stock control and integration, the r2c Online ecosystem turns stock management into an art form, with parts ordered online and appearing when they need to, which in turn keeps jobs moving. Suppliers can be added easily and their stock levels, prices and delivery times compared.

You can allocate resource to where it's most needed and review order history to spot trends and help budgeting. The result is better cashflow, stock levels that suit you, and no costly time wasted waiting for parts to finish jobs off.

FAST, ACCURATE MAINTENANCE AUTHORISATION AND INVOICING

**Finance API now
available.**

Our finance API allows you to connect i2i directly to your finance package, which saves you time and makes invoicing a very simple process.

INTEGRATIONS INCLUDE

sage

qb intuit quickbooks.

MORE COMING SOON

Automate pricing, authorising and invoicing.

i2i is a web-based tool that automates the process for pricing, authorising and invoicing service, maintenance and repair (SMR) work between fleet operators and repairers.

It eradicates the unwieldy game of 'table tennis' - the never-ending back and forth of emails and calls between fleets and repairers. Instead, you can automate large swathes of authorisation requests in just a few clicks.

Quickly generate automatic, pre-reconciled invoices for a dramatic improvement in accounts efficiency. Now, with real-time updates, invoice errors are a thing of the past.

Once a defect is logged in the workshop, a quotation can instantly be created, based on agreed menu pricing. The customer is then able to authorise or query in real-time. It's a win-win.

SOPHISTICATED ELECTRONIC AGREEMENT

- **Maintenance invoicing**
- **Automate authorising**
- **Digital invoicing**
- **Finance API**
- **Rules based authorisation**
- **Menu pricing**
- **Quotations**

INSTALLING NEW SYSTEMS CAN BE DAUNTING. **WE MAKE IT DELIGHTFUL**

Up front, and centre

An all-inclusive package with no hidden costs, plus free hosting, maintenance and disaster recovery.
