1. Pricing Basis and Mechanism

BioEP is a clinical decision-support tool used within the epilepsy care pathway to provide objective, quantitative insight from routine EEGs that are clinically inconclusive or non-contributory.

The standard global list price for BioEP is £300 per BioEP analysis. For the NHS, BioEP is provided as a cloud-hosted software service under a discounted fixed annual licence model, and pricing is not calculated or reconciled on a per-analysis basis. Indicative NHS discount ranges are provided to illustrate typical value relative to the £300 list price at different organisational scales.

2. Annual Licence Fee Pricing

Annual EEG volume (per Health Board/Trust)	Annual licence fee (£)	Indicative NHS discount vs list price*
≤200	£25,000	~15–25%
201–349	£40,000	~25–35%
350–650	£65,000	~30–40%
651–1,100	£120,000	~35–45%
>1,100	Volume-based annual licence fee (capped)	As agreed

* Discounts are indicative and shown for transparency only.

3. Pricing Clarifications

Where routine EEG activity marginally exceeds a stated band threshold, the applicable licence tier may be agreed by mutual discussion at the time of order.

For Health Boards/Trusts with very high routine EEG volumes (greater than 1,100 per year), pricing will be agreed at the time of order based on scope and scale. Any bespoke pricing will not exceed the standard list price of £300 per BioEP analysis. There are no minimum usage commitments. Modest variation in use within the licensed scope does not incur additional charges.

Licence fees include access to the BioEP service, onboarding, and standard support.

4. Price Certainty

Neuronostics provides price certainty through fixed annual licence fees that remain unchanged for the duration of the contract term. Once a licence tier is agreed at the point of order, the annual fee is locked for the initial contract period, providing complete budgetary predictability.

There are no hidden costs, usage-based charges, or per-analysis fees. Modest variations in EEG volume within the licensed tier do not trigger price increases. Where activity marginally exceeds the agreed band threshold, we engage in collaborative discussion rather than automatic tier escalation, ensuring fair and transparent pricing adjustments.

For multi-year contracts, pricing for subsequent years may be adjusted annually in line with the UK Consumer Prices Index (CPI, All Items, as published by the Office for National Statistics), capped at the lower of CPI or 3% per annum. Any such adjustment would apply from the annual contract anniversary and will be notified to the customer in advance.

5. VAT

All prices are exclusive of VAT. VAT will be charged at the prevailing rate in accordance with UK legislation.
